17 Burning Questions

Le'Veon Bell

PHOTO BY CHARLES LECLAIRE-USA TODAY SPORTS

By Andy Behrens

Right from the jump, we should acknowledge that the central concept of this feature is problematic. It implies that we have 17 bankable, rock-solid answers, which is not entirely true. At best, we have informed opinions. The NFL is a league that resists all efforts to predict outcomes, particularly at an individual level.

But we try. We'll get a few important things right, and that's generally enough. A fantasy season can turn on a single decision. The goal is to take you a step or two closer to a league title. Our fondest hope is that after the final snap of the Monday night game in Week 16, you'll be staggering around the house like Seahawks general manager John Schneider — shirtless in a championship belt, delirious from victory.

You've got burning questions, and we've got well-reasoned guesses. Fire away ...

1. After the monster seasons by Zeke, Le'Veon and David Johnson, are we going back to the days when everyone loaded up on RBs in the opening rounds?

First of all, some of us were telling fantasy owners to draft those three dudes near the top last year. (We shall not speak of Todd Gurley's unfortunate ranking.) You never should have fallen out of the habit of selecting elite, high-usage running backs. Those guys are gold in any fantasy format.

Part of the reason Elliott, Bell and Johnson are so valuable, however, is that they enjoy rare workloads. Nothing that happened last season alters the longer-term NFL trend favoring the passing game and devaluing running backs. Consider that in 1998, two quarterbacks topped 4,000 passing yards while 11 different running backs received at least 300 carries (and somehow Jamal Anderson handled 410). Last year, 13 quarterbacks threw for more than 4,000 yards — but Zeke was the only back to see 300 carries.

Running backs are front and center in our annual preseason Q&A

PHOTO BY KEVIN JAIRAJ-USA TODAY SPORTS

Ezekiel Elliott

Basically, the three backs called out in this question, along with LeSean McCoy and perhaps Melvin Gordon, are the ones who have strong cases to be selected in the first round. There's no way we're taking second-tier running backs over receivers like Antonio Brown, Julio Jones and Odell Beckham Jr. Regardless of your scoring format, the early rounds should include positional variety, possibly tilting toward the high-volume receivers.

2. Which rookie RB is going to be this year's Elliott?

My best guess is nobody. Zeke became one of just seven backs in NFL history to rush for more than 1,500 yards in his first season. Leonard Fournette is a phenomenal talent, but he doesn't have the benefit of the Dallas O-line. Christian McCaffrey is a dynamic player, but he has virtually no shot at approaching Elliott's touchdown total from last season (15). Last year at this time, we considered Zeke to be a no-doubt first-round running back. There is no such guy in 2017. Elliott's situation was unique.

3. OK, then who is going to be this year's Todd Gurley, the top-of-draft player who becomes a colossal bust?

It's a fair question, because some early-round back inevitably lets us down in a huge way, either due to injury or miserable performance. Before it was Gurley, it was Montee Ball and Trent Richardson and Peyton Hillis and ... well, you know the names. We don't need to revisit past transgressions. Let's look ahead to this year's potential mistakes.

Jordan Howard is the first name that leaps to mind when considering backs with bust potential because he's facing many of the same headwinds that affected Gurley last year. Chicago's offense isn't exactly loaded with playmakers. It's a transitional year for an under-talented group of receivers, with a sketchy veteran QB (Mike Glennon) and a rookie passer of questionable ability (Mitchell Trubisky) on the way. Sounds a lot like the 2016 Rams.

In that sort of team context, it's difficult for any running back to thrive. Chicago won't produce a high-yield fantasy offense, so Howard was never a great bet for double-digit touchdowns. He'll need to pile up empty yards, as he often did last season. Generally, you want your first- and second-round fantasy picks to be exceptional talents attached to upper-tier NFL offenses. Howard will need to find a way to carve out value despite his surroundings.

4. It seems like maybe you're not a huge Mitchell Trubisky believer. Do any of the rookie quarterbacks have a shot at fantasy relevance this season?

We have to assume that Trubisky and Patrick Mahomes will sit and watch, as both the Bears and Chiefs have well-compensated vets atop their QB depth charts. Also, we have no reason to believe that either player is ready to command an NFL offense. Just as we don't see a Zeke Elliott every year, we don't see

Deshaun Watson

PHOTO BY AP PHOTO/CHRIS O'MEARA, FILE

a Dak Prescott too often, either.

If any first-year quarterback is going to make a splash, Deshaun Watson is the guy. Houston enters camp with Tom Savage as its nominal starting QB, but he's thrown as many touchdown passes in his NFL career (zero) as Watson. Savage has averaged just 6.39 yards per attempt on his 92 throws. He is not the long-term answer for any team. Expect Watson to ascend to the starting role early in the season, if not during the preseason.

Watson does not have a Mahomes-style rocket arm, but he possesses so many other traits — both tangible and intangible — that the NFL prizes. We've already seen him succeed on the biggest collegiate stage, against the most challenging opponents. Best of all, the supporting cast in Houston is unusually talented. DeAndre Hopkins is a do-it-all receiver, Will Fuller is a burner, and Lamar Miller is a quality runner. That offense is ready to roll.

5. So you like DeAndre Hopkins to return to form? Because that guy was not so useful last year.

Houston's quarterback play was breathtakingly poor in 2016. Tom Savage and Brock Osweiler combined for a completion percentage of 59.5 and passer rating of 73.3. They threw only 15 TD passes and 16 picks. They. Were. Terrible. Deshaun Watson faces a daunting learning curve, no doubt, but he's an unflappable player with dual-threat ability. If you watched either of the last two FBS national title games, then you know he can hit anticipation throws, back-shoulder throws, deep throws, short throws ... pretty much all the important throws.

Yes, I feel confident that Watson can boost Hopkins back to his true level. He saw 150 targets last season, and we can expect a similar volume in 2017.

Blake Bortles

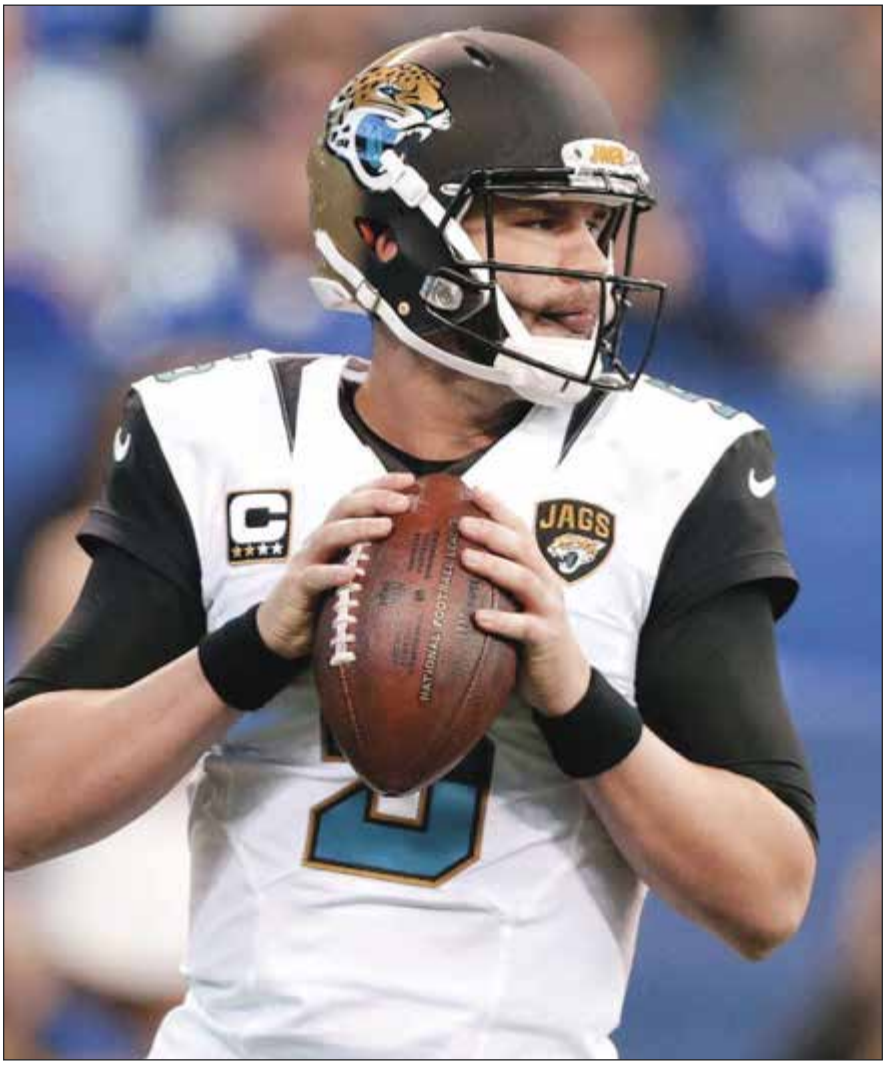

PHOTO BY AP PHOTO/DARRON CUMMINGS

6. What the heck happened to Jacksonville's passing game last season? Just two years ago, Blake Bortles was a top-five fantasy QB. Allen Robinson and Allen Hurns were both 1,000-yard, 10-touchdown receivers. Do you see any chance for a bounce-back?

In the same season fantasy owners fell so hard for Bortles, in 2015, he was pulling off a rare and terrible triple crown. Bortles led the NFL in sacks, interceptions and fumbles. He was irrefutably bad, yet he produced a top-five fantasy campaign in most formats thanks to pass volume. He's the Jim Everett of his era, basically. It's no great surprise that he slipped in the fantasy ranks last season, because he isn't that good.

Robinson is a huge talent and Hurns is no scrub, but it's impossible to fully trust any receiver tied to a scattershot passer like Bortles. We also have to deal with the strong possibility that Jacksonville will lean hard on Leonard Fournette and an improving young defense, hoping to rely less on Bortles' arm. Robinson is the safest bet in this team's receiving corps, as he ranked seventh in the league in targets last season (151) and tied for third in chances inside the 10-yard line (11).

7. Tom Brady turns 40 in August. Don't we have to worry about his age at some point? If not this year, when?

Only five quarterbacks in NFL history have started as many as eight games in a season at or beyond age 40. Of those five, only two have actually produced quality numbers: Brett Favre in '09 (4,202 yards, 33 TDs) and Warren Moon in '97 (3,678 yards, 25 TDs). That's it. Peyton Manning had his last great statistical season at 38, and he was done at age 39.

Brady has given us no reason whatsoever to think he's about to decline. In fact, he was supremely good last season, posting the second-best passer rating of his career (112.2) and completing 67.4 percent of his throws while tossing 28 TD passes and just two picks in 12 games. It can be argued that his 2017 receiving

corps is improved with the addition of Brandin Cooks. It's not unreasonable to make Brady the first quarterback off the board in standard fantasy leagues.

However, let's not get caught up in the idea that he can just keep doing the usual Tom Brady things until he's 45 or 50. History says when a quarterback gets this deep into his career, his decline typically isn't slow, gradual or graceful. Favre and Manning fell off cliffs, statistically speaking. So did Jim Kelly and Dan Marino. Injuries aren't so easy to overcome at 40-plus. Brady is a great play in 2017, but we can make no guarantees about 2018 and beyond. There's a reason New England held onto Jimmy Garoppolo this offseason.

PHOTO BY LIONEL HAHN/SIPA USA/SIPA VIA AP IMAGES

Tom Brady

8. Is Brandin Cooks a clear WR1 after the move to New England? Can he finish top-five?

It's not as if Cooks was in a bad spot last year. Plenty of receivers would pay to be paired with Drew Brees. Cooks may not have been happy with his role in New Orleans, but the man did average 7.3 targets per game from one of the most scary-accurate passers in history. Brees attempted 673 passes last year, completing 70 percent of his throws.

Fortunately for Cooks, he managed to land in yet another stellar situation. Cooks is an impact receiver with field-flipping ability. He finished as a top-10 fantasy receiver last year with the Saints, and there's no reason to think he can't do it again with the Pats. If you draft him expecting last season's stats (78-1,173-8), he won't let you down.

9. What's the LeGarrette Blount replacement plan in Foxborough?

Blount earned a ridiculous profit on his draft price last season. He was a mid-rounder in most leagues and finished as the NFL leader in rushing scores (18). His departure to Philly will leave a whopping 299 carries up for grabs in New England. Not a bad situation for a free-agent running back to step into, eh?

Mike Gillislee, come on down. Here's a classic case of the Pats simply stealing an under-appreciated player from a division opponent. Gillislee averaged 5.7 yards per carry over 101 rush attempts last season for Buffalo, crossing the goal line eight times. We haven't seen him handle a full-timer's workload over multiple weeks, so that's a concern. But at 5-11 and 220 pounds, he's not some undersized gadget player. Expect him to handle at least 200 carries, assuming good health. Dion Lewis and Rex Burkhead figure to have supporting roles, and James White will catch nearly everything thrown his way.

If Gillislee's ADP is no higher than Blount's was last season, then we will have learned nothing. Gillislee has a chance at a huge year.

10. Is there a rookie receiver who has a shot at WR1 or WR2 status? Corey Davis? Mike Williams? Anyone?

This year's rookie class didn't contain a Julio Jones or Calvin Johnson-level athlete, but there was plenty of talent in the opening rounds.

Williams is a terrific player, dominant on contested balls and tested by the best corners at the collegiate level. For fantasy purposes, however, he didn't necessarily land in the best spot. It's nice that he's attached to a quarterback who routinely produces 4,000-yard, 30-TD seasons, but he isn't likely to open as anything more than a secondary option for Philip Rivers. The Chargers have a collection of capable receivers — heck, Mike might not even be the team's most heavily targeted Williams. Recall that Tyrell Williams is coming off a breakout season.

Davis is the first-year receiver with the clearest path to a top-20-ish fantasy finish. He's not a guy with superhuman measurables, but he has all the physical traits needed to consistently win as an outside receiver in the NFL — size, wheels, frame and hands. Tennessee didn't draft him as a developmental project at pick No. 5. Davis and Marcus Mariota have a great chance to emerge as a special WR-QB combo soon. It won't be a surprise if Davis leads the Titans in targets and receptions, and every other meaningful receiving stat as a rookie.

11. How do we like Marshawn Lynch, coming off the one-year hiatus?

Some of us will love Marshawn unconditionally, forever. That guy's Week 16 performance in the Sunday night game in 2014 was a title winner for many of us. We will never be able to satisfactorily thank him. He's the greatest.

Corey Davis

PHOTO BY AP PHOTO/MARK HUMPHREY

Yeah, sure, but how do we like him as a fantasy commodity in Oakland in 2017?

That's a bit more complicated. Many things are working against Lynch: age (31), mileage (2,396 touches) and his dip in performance in 2015. Lynch's final season in Seattle did not go well. He averaged 3.8 YPC and was limited to seven games due to abdominal surgery. Don't assume that his time away was somehow beneficial.

Still, if Latavius Murray was able to rush for 12 touchdowns behind Oakland's line, there's hope for Lynch. He'll benefit from playing in an offense in which he owns the goal-line carries. You can't reasonably forecast a vintage season from Beast Mode, but something like 900 yards and 10 spikes is at least plausible. And c'mon, he's a fun dude to root for. Football is simply better when Lynch is involved.

12. What the heck are we doing with Tyreek Hill?

Hill is a blur, a live-wire quick player with 4.24 speed. He scored in all possible ways last season, finishing with six receiving touchdowns, three on the ground and another three in the return game. He finished as a top-20 fantasy receiver despite seeing only 83 targets.

He's an extremely difficult player to rank for fantasy purposes going forward, because there's no way for him to deliver consistent week-to-week production at such low receiving volume (he saw seven or more targets in only four games). He's the sort of player who can finish as a top-20 receiver while delivering 50 percent of his fantasy output in, like, three games. And that's cool, but it can make him a tricky player to own. And then we have the Alex Smith factor; it's not as if Hill is catching passes from a gunslinger who can maximize his talents.

Hill's ADP at Fantasy Football Calculator in late May was 37.6 overall, making him the 19th receiver off the board in a typical draft. That feels right for a boom/bust talent who will probably deliver his points like this: 3, 6, 33, 4, 26, 3, 3, 4, 7, 4, 24, etc. Of course if you play in a league that scores for return yards (as some do), you should be aggressive with Hill on draft day.

13. Are you recommending return yardage scoring? What are your preferred custom scoring options?

There's a lot that's broken with the scoring systems most commonly used in fantasy football, but the fixes are so simple.

For starters, PPR can die a swift death and I won't miss it. PPR was a patch for a fantasy bug that no longer exists. Back in the day, reception bonuses were a way to elevate the value of receivers and tight ends relative to running backs. If you were drafting fantasy teams back in the '90s or the aughts, then recall the way we hoarded running backs in the early rounds. In those days, it made sense. Running backs commonly received 300-plus carries and dominated the scrimmage yardage leader board each year. Today, that simply doesn't happen. (See question No. 1 above.) The NFL itself has corrected the problem that PPR was meant to address. The scoring system is a relic. If we want our fantasy leagues to reflect the actual in-game events that have value, we wouldn't score a catch for no gain the same as a 10-yard run.

But before you accuse me of being a standard scoring holdover, allow me to share a few tweaks I like to make in custom leagues:

- Points for first downs (PPFD). Unlike the simple act of catching a football, first downs have indisputable real-world value. Replace PPR with PPFD and make the world a better place, people.
- Six points for passing TDs and significant negative penalties for interceptions and fumbles. In reality, turnovers are game-altering events. We should score them as such in our game (preferably minus-4). These changes to QB scoring create a great deal more separation between the elite passers — Brees, Brady, Rodgers — and the high-volume chuckers.
- More and better defensive scoring. Many fantasy providers allow bonuses for three-and-outs, tackles for loss and various other defensive goodies. We can use these to better reward the game's best real-world defenses and minimize the impact of random scoring events, like defensive TDs.

I can get on board with return yardage scoring, too, as long as those yards aren't treated the same as rushing and receiving

gains. It's a meaningful part of the game; no need to ignore it.

14. Let's get back to actual players. What's the scoop on Cam Newton entering 2017? Last season was a minor disaster.

Minor if you didn't own him, major if you drafted him as an every-week starter. Cam produced the lowest completion percentage (52.9), yards per attempt (6.88) and passer rating (75.8) of his career. He was a mess, and his wide receivers didn't do him many favors. And the line play was poor. And Newton was dinged. And his running backs were *meh*.

Newton dealt with lots of issues. The addition of Matt Kalil should, in theory, help the O-line. Kelvin Benjamin is another year removed from ACL surgery. The team spent early-round picks on Christian McCaffrey and Curtis Samuel, dynamic athletes who can deliver big gains on short throws. Cam's supporting cast appears to have improved, perhaps in a significant way.

The remaining problem is Newton's health. He had surgery on his throwing shoulder in April, and underwent a procedure on his ankle the previous offseason. His medical chart is quite a bit messier than it used to be.

We may have finally reached the stage in his career when he dials back the rushing attempts. On top of his slide in passing stats last year, he also set single-season lows in carries (90), rushing yards (359), YPC (4.0) and rushing scores (5). If Newton isn't running for 500-plus yards per season and regularly making house calls, he'll lose his QB1 status in fantasy. Remember, he's produced just one season with more than 25 touchdown passes, and hasn't topped 4,000 yards passing since he was a rookie.

15. Is a breakout season ahead for Jameis Winston? The Bucs have added plenty of talent at the skill spots.

Winston has produced a pair of top-15 positional finishes, and last year he made modest but meaningful gains as a passer. He already seemed capable of a value leap before Tampa Bay went shopping in the offseason. DeSean Jackson was the big buy, and he's an ideal complement to Mike Evans. D-Jax remains one of the NFL's most intimidating and dangerous vertical threats.

Additionally, the Bucs drafted rookie playmakers for all occasions, selecting Boise State back Jeremy McNichols, a Combine hero, as well as Alabama tight end O.J. Howard and Penn State receiver Chris Godwin. Over the next two seasons, this team's offense should really begin to roll. It isn't hard to imagine Winston's passing yardage jumping to 4,400 and his touchdown total climbing toward 30. I'm on board.

16. Is any other QB in line to make a comparable leap?

Don't sleep on Andy Dalton. As a draft value, he probably offers more profit potential than Jameis Winston. Cincinnati drafted Washington receiver John Ross, the kid who ran a scorching 4.22 in the 40, plus the team added Oklahoma's Joe Mixon, arguably the most polished receiving back in this year's draft. A.J. Green is still in the team picture, and Tyler Eifert is hoping to be ambulatory by training camp. Dalton has no shortage of interesting weapons at his disposal.

It wasn't all that long ago that people were tossing Dalton's name into the MVP conversation. A thumb injury in December 2015 brought an early end to a terrific statistical year by the Red Rifle, who'd been on pace for a 4,255-yard, 32-touchdown campaign. His receiving corps this season could be just as impressive as that year's group.

17. Before we wrap this thing up, do you have any expert words of wisdom on post-draft team management?

Be an active owner, from opening week through the final night of your season. Add, drop and trade. React. You'll never win a competitive fantasy league by simply drafting a team and watching the points roll in, making few moves. Pro football is a messy game, ruled by injuries. Player values aren't static. If you ignored the waiver wire last season, then you whiffed on Michael Thomas, Jay Ajayi, Davante Adams, Dak Prescott, Jordan Howard and a dozen other difference-makers.

If you look back on the roster originally drafted by your league's winner last season, you'll be surprised at the number of big misses — picks spent on players who were quickly dropped or dealt away. No one nails a draft, beginning to end. The best owners recognize that their draft is just a starting point.

How the fantasy pros play the game • • •

Any group of folks can run a mock draft, a pretend exercise that is quickly tossed aside. But for the 2017 Lindy's PPR mock, each of the 12 competitors put up a small entry fee; everyone has real skin in the game. We'll score the league using a best-ball format (you get your perfect theoretical lineup weekly; no pickups, no lineup setting). By giving every owner some tangible incentive, we get a better study tool for all. The top three finishers win prizes.

Every week, we'll start (post-facto) 1 QB, 2 RB, 3 WR, 1 TE and 1 DST. You'll get an additional flex player, your highest remaining scorer at RB, WR or TE. And the heck with kickers; they were not invited to this mock draft. Touchdown passes are four points; all other TDs are worth six. Receptions are a point. QBs get a point for every 25 yards; everyone gets a point for every 10 yards rushing or receiving. Defenses are graded on a combination of takeaways points allowed, and defensive touchdowns scored.

MY STRATEGY: In best-ball I put heavy emphasis on players' ceilings, and I don't mind a high degree of week-to-week volatility. I want guys who'll hit their 13-point averages for the season with a bunch of 21s and 5s, not 15s and 11s. If you aren't going to crack the starting lineup in a given week, let's not have you coming close and thus wasting points. Go ahead and stink.

HOW IT WORKED OUT: I got the team I wanted. If I have the rookie running backs scouted incorrectly, or I'm wrong about how supremely useful Tyreek Hill and Erik Swoope will be in 2017, hey, that's on me.

PICK TO PROMOTE: I really like Marlon Mack, the fourth-round rookie running back in Indianapolis. It isn't actually true that Frank Gore is ageless; he's 34, it says so right there in the media guide. And Mack is 21 and electric on tape — an insta-swivel who makes about the most fluid cuts I can remember. Many mid-round running backs become nothing as pros, of course, but some become Jordan Howard. Mack has a chance.

PICK OF REGRET: I picked the Tennessee defense not because I like the defense (although it may be fine, what with a new secondary and a very old Dick LeBeau), but because it faces a slew of crummy offenses in a schedule that more or less complements my DST1 (Denver). The logic is sound, but having to root for any DST2 is the hold-your-nose part of this format.

MY STRATEGY: As usual, I planned on waiting on quarterback, but then I ended up being the first person to draft one (Aaron Rodgers at 4.11). There just wasn't anyone I loved at that point, and the whole waiting on QB strategy may be going too far at this point. I mean, Isaiah Crowell went ahead of the best player in football.

HOW IT WORKED OUT: It was a bit odd not to take a wide receiver until the fifth round, but I'm happy with this team, even if I diverged from my original strategy.

PICK TO PROMOTE: Nearly 100 picks in I grabbed Mike Gillislee, who has been a common member of my teams so far this year. He's taking over the role as New England's "big back," one that led to the most rushing touchdowns in the NFL last year. And he's arguably a better back than LeGarrette Blount.

MY STRATEGY: In the first 6-8 rounds I wanted to capture as many touches as I could, preferably from high-yield offenses. Past that I was looking for home-run picks all the way — players who could have a monster season or at least 5-6 high-scoring weeks. Second place is a push and anything worse is a losing hand, so I'd rather go down swinging than play it safe. I'm overweight on Bucs and Browns players; I think those offenses could pleasantly surprise.

HOW IT WORKED OUT: This team came together pretty well. I have a bell-cow RB, two perennial top-12 WRs, the top TE in the league, and a QB who has posted elite stats every year since 2008. That's a strong core, to which I added some proven producers with high weekly ceilings. I'm not a big hand-cuffer, but I did take Charles Sims late to pair with Doug Martin.

PICK TO PROMOTE: Drew Brees in the late sixth round is straight larceny. Since 2008, he has posted five of the nine 5,000-yard seasons in NFL history while never throwing fewer than 32 TD passes during that span.

PICK OF REGRET: As soon as I made the Alvin Kamara pick, I was kicking myself. I wanted Eric Ebron there but got sniped by Jenstad. I should have regrouped and rethought, but I rushed the pick instead. Kamara might not be terrible, but if I'm going to bankroll a rookie in this format, I need to see something that pops when I watch his college tape. With Kamara, the best I can say is the Saints traded up to get him, and that's not enough for me.

MY STRATEGY: Picking at No. 4, I hoped a top-three running back would fall to me, but if not, I wanted to snag two running backs quickly as I think the depth at receiver in Rounds 4-8 is much easier to navigate this year than at running back. I also wanted to grab a top tight end in the first five rounds and then fill in with wide receiver depth. I planned to wait at quarterback, but then quickly grab two of them to take advantage of having two of the top 15, a strategy I like in a best-ball format.

HOW IT WORKED OUT: The running back didn't fall to four, but Antonio Brown is a pretty decent consolation prize. I was able to get two running backs I like in Rounds 2 and 3 and also get a top-five tight end, but my WR2 and WR3 are weaker than most of the field, so I have to hope that my thought about the depth at wide receiver turns out to be right. I was pleased to pair up Matthew Stafford and Philip Rivers at QB — that will be a strong combo in best ball.

PICK TO PROMOTE: I love Christian McCaffrey and can't wait until he unleashes his skill set on the NFL. In full-point PPR, he is going to rack up a ton of points and finish in the top 10 among running backs by season's end. I held my breath on the four picks after Leonard Fournette was selected, hoping C-Mac would get back to me at 3.4.

PICK OF REGRET: I don't love Kelvin Benjamin as my WR3. He topped 100 yards once last year and had a 10-week stretch in the middle of the season where he scored just once. For a guy who is the supposed WR1 on his own team, he has too many dud games, which can really hurt in a best-ball format. News of him showing up out of shape to offseason workouts in May only ramped up my regret with this pick.

MY STRATEGY: Get reliable WRs early; invest in rookie RBs with high probability of ending up in prominent roles; avoid rookie WRs and TEs; get Tom Brady.

HOW IT WORKED OUT: It worked well. I'm thrilled with my wide receiver haul, and my three-headed hydra of first-year runners — Joe Mixon, Samaje Perine and Kareem Hunt — should play nicely. Sadly, Brady was

sniped just in front of me in Round 6, while Drew Brees was still available, too. I settled for the 2016 MVP instead.

PICK TO PROMOTE: Blake Bortles. Look, nobody is ever going to join me in adoring BB5, but I don't mind. I love watching him play, and no pick in the draft made me happier. This year is going to be the year that Bortles puts it all together. He's going to Canton someday (no, haters, not as a paying customer — as an inductee).

PICK OF REGRET: Paul Perkins in the eighth round is ADP-compliant, but I really question the player and in hindsight probably should have gone with a boring veteran, a.k.a. Frank Gore.

MY STRATEGY: The strategy is always "read and react." By that I mean I take the value that falls and adjust my roster construction around the makeup of my early picks.

HOW IT WORKED OUT: It went as planned. I wound up with a top TE (Greg Olsen, fifth round) and top QB (Tom Brady, sixth round), not because I was targeting them, but because they fell to what I think are great prices/values. That meant I knew early on that I would only roster two TEs and two QBs, and I could focus elsewhere.

PICK TO PROMOTE: Matt Forte in the 13th round, as the 50th running back off the board. Forte finished RB19 in this format last year, despite injury and competition from Bilal Powell. Those concerns persist this year, but just a quarter of a season out of Forte easily pays off his price tag in this draft.

PICK OF REGRET: Eddie Lacy at 7.6, the 25th running back off the board. I don't love Lacy, but I felt like I couldn't let the potential Seahawks RB1 slip any further. Knowing now which running backs I was able to get later in the draft, I think a receiver would have been a better move there.

MY STRATEGY: I wanted to go Zero-BADQB. That means I didn't want any players on teams that I believe are likely to be weak at quarterback in 2017. My avoid list: Jets, Browns, Jaguars, Texans, Broncos, Niners, Rams, Bears, Eagles. But your mileage may vary.

HOW IT WORKED OUT: Easily. I was never conflicted or feeling like I was giving up a great value. This is especially important at the wide receiver position, where I am loaded — important in a best-ball format.

PICK TO PROMOTE: I think Jamison Crowder will be the No. 1 wide receiver in a good offense and thus has WR20 value at WR31. I am not a Terrelle Pryor fan, especially given his lack of polish plus being in a new system.

PICK OF REGRET: This is tough in a draft … Not that all my picks are great. But I am maybe too bullish on Jameis Winston's upside with his new toys.

MY STRATEGY: The plan was to target running backs I expect to be touchdown-heavy in their respective offenses this season and to reach a round early on some of my wideout targets. I wanted to have a strong pair of quarterbacks whose schedules would fit optimally.

HOW IT WORKED OUT: LeSean McCoy, Marshawn Lynch, Mark Ingram and LeGarrette Blount certainly fit the bill for my plan, and my timing on Blount was perfect as I selected him the day before he signed with the Eagles. The quarterback pairing of Dak Prescott and Marcus Mariota worked out, giving me two of the better young gunslingers in the league. Breshad Perriman and Cameron Meredith were two of the aforementioned mid-round WR targets, and I was happy to get them both. My tight end combo of Zach Ertz and JuliusThomas leaves a bit to be desired, but both could be solid red-zone targets.

PICK TO PROMOTE: Kenny Golladay as my WR7 could end up being worthwhile in the 16th round. He's a 6-foot-4 receiver with long arms and a big catch radius and should lock down the No. 3 receiver role for the Lions.

PICK OF REGRET: I'm not ecstatic about third-round pick Davante Adams. The Packers are loaded with receiving options, especially if Ty Montgomery moves back to WR, and Adams may very well not be a consistent source of production.

MY STRATEGY: Take what the draft gives you. Don't force running backs if they're not there; in a best-ball format, you can get a little looser at that position. Rig the draft lottery so that I have an early selection (I kid, I'm a kidder).

HOW IT WORKED OUT: I picked ninth, so you know I didn't hack the draft order. I did a semi-punt at running back, so that's where I need to get fortunate. I also need Jordan Howard to be the real thing, no matter how lousy that team around him might be.

PICK TO PROMOTE: Bilal Powell is the best offensive player on the Jets; this should be the year he pushes Matt Forte out of the way. I also like the value on Michael Crabtree; he's not as flashy as Amari Cooper, but one guy consistently scores touchdowns and one guy does not.

PICK OF REGRET: I took Kenneth Dixon too early, given the competition in-house and a looming suspension. I like Hunter Henry, but don't select him before Delanie Walker; for some inexplicable reason, I did that.

MY STRATEGY: Try to hold off on QB and TE to get optimal value while stocking up on RBs and WRs I like. I also went WR in the first because I preferred the likely RBs available to me in the second over the WRs.

HOW IT WORKED OUT: I got a top-7 QB from 2015-16 in the 10th round, so that was good. I did go BPA in the fourth with the best player on the board in Travis Kelce, which wasn't a terrible move with three RBs/WRs already in the fold.

PICK TO PROMOTE: Running back Joe Williams in the 15h round at pick 178 should go down as a strong value, since Kyle Shanahan hand-picked him — and Shanahan isn't high on Carlos Hyde.

PICK OF REGRET: Derrick Henry in the eighth round at pick 87. I was not high on Henry in 2016 and am only slightly higher on him this year. As long as DeMarco Murray is healthy, Henry isn't likely to be a valuable asset over the course of the entire season.

MY STRATEGY: My plan in these industry drafts is to take a few strong stances, wait on quarterbacks until well into the double-digit rounds, and not get suckered into taking bad running backs just because there are not any good ones left.

HOW IT WORKED OUT: Taking Devonta Freeman in the first round is not something that I expected to do, but picking at the end of the round is a pretty tough spot this year. My running back corps is a motley crew but with a few injury breaks, my team might be able to contend.

PICK TO PROMOTE: Stefon Diggs late in the third round in a fantasy environment where high-floor wide receivers are going much higher seemed like a steal. Diggs has to be a heavy favorite to repeat his target volume from 2016. The Vikings offense, in general, should be more dynamic and the emergence of Adam Thielen can't do anything but help.

PICK OF REGRET: Ty Montgomery might end up being my worst pick; he is not a running back by nature and the Packers invested in the position in the 2017 draft. A sixth-round price tag is fair, but his floor is a player who ends up being a third-stringer.

MY STRATEGY: In the best-ball format, my general strategy outside of playing into positional requirements is to accrue as many bankable touches and targets as possible and throw them at the wall.

HOW IT WORKED OUT: Being on either turn in industry drafts can get a little sketchy, but I came out feeling good about things structurally and player-wise. I'm not positive I have the requisite ceilings to win a league like this, but I'd wager I'm in the top quarter of the league, if not really a threat for the top spot. I was able to land a lot of value in my initial 4-5 wide receivers. I also flew the closest to the sun at quarterback, being the last team to select one.

PICK TO PROMOTE: Keenan Allen at WR21 and Martavis Bryant at WR34 have some real juice to out-produce those costs, and John Brown and Mike Wallace are two of my main bench targets this year as I feel both are criminally undervalued.

PICK OF REGRET: Carlos Hyde is not someone I'm crazy about. He has just 20 starts at running back due to injuries, and over those starts, he's been a top-12 scorer in six while outside of the top 24 in 11. He's in a contract year and was drafted by the previous regime.

ANALYSIS: The industry folks who took part in *Lindy's* 2017 mock draft turned a cold shoulder on the quarterbacks; Rodgers was the first one off the board — at No. 47 overall. But the Tier 1 passers — Rodgers, Brady and Brees — are likely to get plucked earlier in most fantasy drafts … Ryan could vault into the top tier with a repeat of his epic 2016, and, less likely, Newton could join him with a reprise of 2015 … Tier 3 contains the rest of the QBs good enough to hold down every-week starting assignments in fantasy. Mariota is the most likely among them to jump a tier in 2017 … Tier 4 is where you'll find the best backups and spot starters. Dalton could easily climb into Tier 3 (or higher) by season's end.

EZEKIEL ELLIOTT

ANALYSIS: Because the every-down workhorse running back is a dying breed, Johnson, Bell and Elliott belong at the very top of any reliable checklist. Johnson averaged 23.3 touches per game last season; Elliott handled 23.6 touches per game; and Bell averaged an astounding 28 … The seven players in Tier 2 are candidates to compile 1,500 total yards and 10 or more touchdowns. Each of the seven could be gone by the middle of the second round in 12-team fantasy leagues … Rookie Christian McCaffrey might be the most exciting player in Tier 3, his uncertain workload with the Panthers notwithstanding. If he gets his fair share of goal-line work, he could easily vault into a higher tier … Tier 4 is home to a handful of veteran grinders with more limited skill sets. It also features rookie Joe Mixon, an NFL-ready back who could thrive with the Bengals … In Tier 5, you'll find quality depth, with Gillislee and Powell offering the most plausible upside … Tiers 6 and 7 are home to flex and RB3 candidates mixed in with pass-catching specialists.

Sorting comparable players into tiers is a key to successful value-based drafting. Here's how we group them for 2017.

ANALYSIS: The four wide receivers in Tier 1 are sure-fire first-round fantasy talents capable of amassing more than 100 receptions and 10 touchdowns in a more-or-less average campaign … There is elite talent in Tier 2 as well. Green has been dinged by injuries in two of the past three seasons but is capable of first-round numbers. The rest of the Tier 2 receivers should be gone by the end of the second round … Tier 3 is thick with high-volume receivers, some of whom could jump a tier with improved TD totals. These are your high-end WR2 candidates with upside … Things become more unpredictable in Tier 4. The group of 13 includes a handful of players who changed teams for 2017, and another handful returning from injury … In Tiers 5 and 6, you'll find some deluxe WR3 and flex options, a few veteran worker bees and promising Titans rookie Corey Davis.

ROB GRONKOWSKI

ANALYSIS: While he's no longer someone to target in the first round, Gronkowski remains in his own little universe as the NFL's most dynamic tight end. He's the only player in Tier 1 … The three players in Tier 2 are all capable of 1,000-yard seasons. Reed has the tools to threaten Gronk as the game's best tight end, but can't seem to stay healthy … If you miss out on the elite tight ends, you can still hold serve with any of the players in Tier 3 … The remaining potential every-week starters are found in Tier 4, with backups and projects in Tiers 5 and 6.

Fantasy Grading System

FANTASY GRADING SCALE

Our grading system weighs many factors — talent, consistency, opportunity, system, supporting cast — before arriving at a number for each ranked player. While the grades apply in basic touchdown leagues, they best reflect a player's value in yardage leagues that award four points for a touchdown pass, six points for a touchdown run or reception, one point for 10 yards rushing or receiving, and one point for 25 yards passing.

5.0 FRANCHISE PLAYER. He's the man. Draft him first and build your team around him.

4.0 FANTASY STUD. He's all that. Grab him in the second or third round and expect big numbers.

3.0 SOLID STARTER. He's steady Eddie. Take him in the middle rounds and live with the consistent results.

2.0 AVERAGE STARTER. He's just another guy. Draft him late and hope for the best.

1.0 MARGINAL PLAYER. He's a waste of time. Forget about it.

WHO WINS BIGGER

Fantasy Football or Wayne Allyn Root?

When my players get a dozen points over the line, that's not make believe. And when they collect $200, $300 or even $500 on a $100 bet, that's NOT fantasy...

That's reality! Root Reality.

Start making plans. Because YOU and I have a date with Lady Luck. You are destined to have the season of your life and I am destined to be the man that gives it to you!

That's not fantasy. That's a rational prediction based on my 30 years of documented success.

You know my name and my story. Yes, I've picked more winners than any other handicapper in football and for the 17th time in 17 years, more outright underdog winners, a total of 1,176 since 2000, and no-one else comes close. This is serious business. My record has been documented by Sports Monitor, the leading record keeper of our industry, for 30 years.

But back of all the P.R. and the marketing nonsense is the **ROOT REALITY**: My methods of pointspread analysis targeting the best games, a contrarian betting plan that works non-stop at measuring overlays so we are always getting the biggest edges.

So that, whereas with fantasy football, every now and then you might find players to help you make a big score, in *Root Reality Football*, all my guys are banging the boards nearly every week!

We don't need fantasy. *Real* football is so full of schedule traps, revenge games, lookaheads, letdowns and travel angles, you can make all the money you want just off what's right there under your nose!

And it's not just the *quantity* of winning. It's the *quality*... Not merely underdogs that covered the spread, but ***dogs that won outright.*** And here's where my game leaves fantasy football in the dust.

You can bet my Outright Upsets Against the Money Line and Collect Odds!
Look at these 2016 early season payoffs!

				MONEY LINE PAYOFFS (This is your return on a $100 Bet)
9/3	Wisconsin (+10½) over LSU	16-14	WON	$390
9/3	Houston (+13 ½) Oklahoma	33-23	WON	$485
9/18	Rams (+6) over Seahawks	9-3	WON	$210
9/18	Falcons (+4½) over Raiders	35-28	WON	$170
10/8	Navy (+17½) over Houston	46-40	WON	$750
10/8	Oregon State (+13½) over California	47-44	WON	$400

How would you like double or triple odds payoffs when you bet? MY kind of football puts *fantasy football* in the shade... In that gray zone occupied by crap shoots and dartboards.

The plan I have in mind makes the most sense because, besides dogs that win outright, I'll be giving you terrific covers and even some favorites. Check out this sample from last September:

9/4	Texas (+4½) over Notre Dame	50-47	WON
9/10	Washington St (+10½) over Boise State	28-31	WON
9/17	Ole Miss (+11) over Alabama	43-48	WON
9/18	Panthers (-13) over 49ers	46-27	WON
9/23	TCU (-21½) over SMU	33-3	WON
9/24	Auburn (+3½) over LSU	18-13	WON
9/25	Chiefs (-2½) over Jets	24-3	WON

Ready to try me out for two weeks?

GET MY ROOT REALITY SAMPLER:

- **Saturday:** My strongest **OUTRIGHT UPSET WINNER** - and you can bet it on the money line for odds- plus a second play that *Could win straight up* but that will definitely cover.
- **Sunday:** The same as Saturday, an **OUTRIGHT UPSET WINNER** and a **HOT COVER.**
- **My fee for the two weeks – which will include select Mondays and Thursdays, around a dozen or more games –** is only **$49.**
- Or, if you're already convinced reality gives you a better shot than fantasy, come in for the whole season for only $249 and save even more!

A parting thought:

WHO SAYS YOU CAN'T BE THE BIGGEST WINNER YOU KNOW?

Get rid of loser guilt. Stick your chest out. Don't *slink* up to the ATM machine, stride like a man because you just won again! I know the feeling. And so do my customers, who keep coming back for more – and why not? ***I make fantasies REAL!***

STATISTICAL CONSIDERATIONS:
It sounds silly now, but Rodgers and the Packers were getting bombarded with criticism on the eve of a Thursday night game with the Bears in Week 7. Rodgers got his groove back that night (326 yards, three scores) and went on to throw 30 touchdowns against just three picks over his final 11 starts. He threw for multiple TDs in every start but one — a poorly timed clunker in Week 15, the fantasy playoffs. Rodgers led the league in touchdown passes for the first time, and he hasn't thrown double-digit interceptions since the 2010 season.

FANTASY SPIN: Rodgers didn't have his best efficiency year — a modest 7.3 YPA — but he set career marks for attempts, completions and TD passes. And don't overlook his value as a scrambler; he was third in QB rushing yards and fifth in QB rushing touchdowns. Rodgers has sustained just one major injury in nine years, so he checks the durability box as well. While he might not be the player he was in 2011 and 2012, he's still in charge of a bankable offense that relies on the passing game to score. Picking an early fantasy quarterback isn't for everyone, but if you're going to tap that tier early, Rodgers should be the first target. In seven of his last eight complete seasons, he's been the No. 1 or No. 2 fantasy QB.

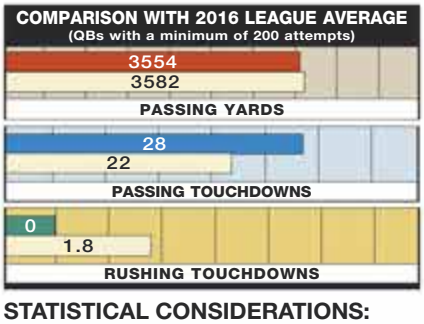
'16	NE	12	432	291	67.4	3554	28	2	28	64	0



STATISTICAL CONSIDERATIONS:
Starting the year with a month holiday seemed to keep Brady fresher through the grind of last year. He posted his best YPA in five seasons, and had his best touchdown percentage since 2010. Brady's always good at avoiding negative plays, but just two interceptions on 432 pass attempts — that's just silly. He also had his best sack avoidance rate since 2009.

FANTASY SPIN: Brady keeps talking about playing well into his 40s, and there was nothing from his age-39 season that raised any doubts. If you're sick of New England's ongoing success or you believe in things like the Madden Curse, don't pick Brady. We tend to believe there aren't monsters under the bed, and Brady's cast of characters (hello, Brandin Cooks) might be his best since the Randy Moss days.

'16	NO	16	673	471	70.0	5208	37	15	23	20	2

STATISTICAL CONSIDERATIONS:
Playing from behind and garbage time can be a misunderstood fantasy narrative at times, but it's seemed to help Brees in recent years. Although he's had a losing record in four of his last five years, it hasn't stopped the pinball game in the Superdome. Brees has led the league in passing yards in five of the last six years, and he's attempted at least 627 passes for seven straight seasons. Brees had a few road-game bumps in past years, but his road resume last year was just fine (17 touchdown passes, 95.7 rating).

FANTASY SPIN: The up-and-down success of the Saints hasn't held Brees back from a fantasy perspective. He's finished inside the top six at the position for 11 straight years — dating back to his San Diego days — and was a sturdy third in 2016. The Saints will feel a sting with Brandin Cooks out of town, but head coach Sean Payton knows how to assemble a diverse and dangerous passing game, and Brees is as good a conductor as any. No matter where the Saints are headed in 2017, Brees should be a terrific compiler again.

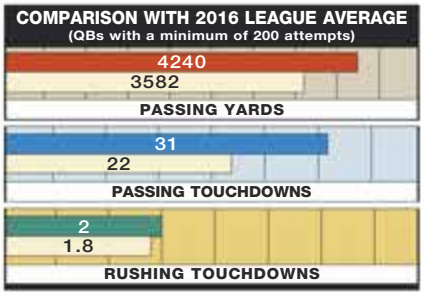
'16	IND	15	545	346	63.5	4240	31	13	64	341	2



STATISTICAL CONSIDERATIONS: Less was more for Luck last year — although he attempted the fewest passes of his career (not counting injury-ruined 2015) — he posted his best completion percentage and was an eyelash under his best passer rating. Luck also had his best YPA since hitting Indianapolis, and tacked on a useful 341 rushing yards and a couple of scores.

FANTASY SPIN: If we wipe 2015 off the books, Luck is the No. 4, No. 2 and No. 4 fantasy quarterback in the last three marking periods. The Colts remain shaky on defense and in the running department — Frank Gore can't run forever — which means Luck's volume will probably be on the increase this fall. He remains a very safe, reasonable place to park your money.

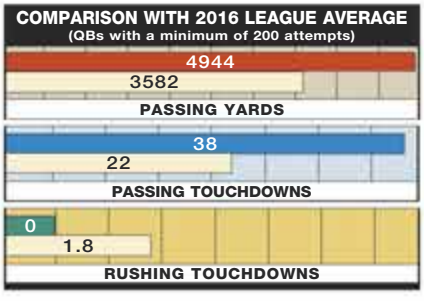
'16	ATL	16	534	373	69.9	4944	38	7	35	117	0



STATISTICAL CONSIDERATIONS: Sometimes everything goes right for you in the red zone and sometimes everything falls apart. Only 3.4 percent of Ryan's passes two years ago went for touchdowns — the worst rate of his career — but he positively improved last year, getting a score on 7.1 percent of passes, tops in the league. Ryan also led the league in YPA and passer rating, en route to a well-earned MVP award. His era-adjusted passer rating of 140 stands as the 10th-best quarterback season since the merger in 1970.

SCOUTING PROFILE

FANTASY SPIN: Ryan gets points for consistency — he was the only QB to throw a scoring pass in every game last year — and for spreading it around — he threw TD passes to 13 different players, an NFL record. The loss of offensive coordinator Kyle Shanahan has to be considered, but most of Ryan's offensive playmates from last year are coming back. Even with some regression sliding in, Ryan still offers a very high floor.

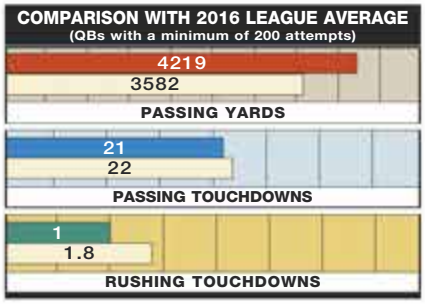
'16	SEA	16	546	353	64.7	4219	21	11	72	259	1



STATISTICAL CONSIDERATIONS: It's difficult to take Wilson's 2016 season at face value; the Dolphins dealt him an ankle injury in the season opener, knee problems soon followed, and Seattle's offensive line was a mess for most of the season. He still had some fun moments here and there, but saw a major decline in his touchdown rate, a collapse in his scrambling metrics, and a few extra interceptions.

ANTASY SPIN: Perhaps Wilson's TD rate will rebound nicely, like Matt Ryan's did last year. The Seahawks still have plenty of key personnel in their offense, and Wilson's rushing contribution probably can't go as low as it did a year ago. Accept that Wilson dipped to the No. 11 fantasy quarterback last year, but don't forget that he was the No. 3 man in both 2014 and '15. Take note that his total attempts have increased for five straight years. Explosive returns could be coming in Wilson's age-28 season.

FANTASY SPIN: Newton's been a top-four fantasy quarterback in four of his six seasons, but his other two years were flame-outs — a 17th-place finish in 2014 and last year's No. 18 rank. We nonetheless can't keep him out of the top 10 because of his rushing ability, and the expectation that he'll rebound to some extent from last year's shocking slump. The Panthers targeted playmakers in the draft, adding pass-catching weapons in Christian McCaffrey and Curtis Samuel. Fantasy players who cut Newton some slack for last year's collapse might collect a significant reward this time around.

STATISTICAL CONSIDERATIONS: For all the sunshine thrown at Big Ben over the years, he's been a top-10 fantasy quarterback in just one of his past seven seasons. Part of that speaks to durability issues — he's played a full season in two of eight years — and it also reflects a stunning home/road disparity. FANTASY SPIN: Not every football analyst buys into the idea of home/road splits, but they're so jagged in Big Ben's case — and over a course of three years — that we're inclined to put some stock into them, even if we can't explain them. Does Roethlisberger need a better hotel mattress? A sleep aid? A soothing lullaby? We're loathe to rank him lower because we know how fun the puzzle pieces are in Pittsburgh — hey, Le'Veon; yo, Antonio — but we don't blame anyone who views Roethlisberger as merely a spot starter at this stage of his career.

STATISTICAL CONSIDERATIONS: Mariota jumped into the top 12 at the position in his second year — basically, an every-week starter — and improved in just about every significant metric. His sack avoidance was cut almost in half as he learned how to navigate the pocket. He averaged a modest 22.3 rushing yards per game, which seems tame given his resume from college. He often does his best work inside the red zone, where he has a 113.5 rating as a pro (and has never thrown an interception).

FANTASY SPIN: The Titans brought in more playmakers for Mariota to play

with — starting with first-round wide receiver Corey Davis — and it's not uncommon to see a quarterback make a third-year leap. The only thing that might keep him from a further jump is the presence of Tennessee's strong running game. Nonetheless, this appears to be a stock that's still on the escalator.

STATISTICAL CONSIDERATIONS:
Much like his rookie year, Winston's second season was a mixed bag. His touchdown rate and completion rate improved, but he threw more picks, took more sacks, and essentially had a flat rating. Winston's six rushing touchdowns from 2015 looked like a stone fluke and they didn't repeat — just one last year.

FANTASY SPIN: The Bucs loaded up the fridge for Winston in the offseason, signing deep threat DeSean Jackson and drafting well-regarded tight end O.J. Howard. Maybe Howard won't make an instant impact — tight end can be a daunting position for rookies — but Jackson is one of those players who helps an offense merely by his presence on the field. Mike Evans is still around as well, one of the elite receivers in the game, but the Bucs have an unsettled backfield. Winston profiles as an every-week fantasy starter this year; a significant numbers spike is possible.

STATISTICAL CONSIDERATIONS:
Rivers hasn't had a lot of team success lately — the Chargers have just nine wins the past two years — but he's been forced to throw the ball a ton and it's led to good fantasy returns (QB11, QB14). He hasn't missed a start since he became the team's starter in 2006 (in part because he's not a runner at all — just 575 career rushing yards). Playing from behind led to some ugly fourth quarters last season: Rivers threw nine picks in the final quarters of games and took 12 sacks.

STATISTICAL CONSIDERATIONS:
Stafford was considered a dark-horse MVP candidate — misguided or not — around midseason last year, when he had a 103.4 rating and 16 touchdown passes. He didn't do much the rest of the way (eight TDs, six picks, 84.3 rating) and the Lions were soundly beaten in the playoffs. FANTASY SPIN: Stafford has led the Lions to three playoff appearances as a pro, but they've yet to win a game in the second season. That's a fair parallel to his fantasy value — he seems like the type of player who is good enough to contend with, but not quite good enough to carry you on his back. If you believe quarterbacks should be drafted on a budget, Stafford is a reasonable target for the cheaper rounds. We give him credit for keeping his value afloat last year even without Calvin Johnson, but don't start dreaming of false upside. We've probably seen his peak.

STATISTICAL CONSIDERATIONS:

Carr's rating improved for the second straight year in 2016, largely due to an increased presence in the pocket. He cut his interception rate in half, and was, on percentage, the hardest quarterback to sack in the league. His numbers were stable home and road, and his monthly splits were reasonable, though he had a minor slump in December (largely due to a finger injury). Oakland's surprise trip to the playoffs was put on ice when Carr suffered a broken right leg in Week 15.

STATISTICAL CONSIDERATIONS:

Prescott was especially poised and consistent in his rookie year, finishing as QB13 or higher in 10 of his 16 starts. Six rushing touchdowns were a major boost to his fantasy value, and an interception rate below 1 percent is almost too good to be true (surely that will rise this year). FANTASY SPIN: Prescott started the year as an emergency fill-in for the Cowboys, but his consistent play kept Tony Romo on the bench — and eventually sent him to the announcing booth. The league should have new wrinkles to throw at Prescott this year — and the Pokes have taken some hits on the offensive line — but Prescott's rushing ability, presence and moxie should be enough to keep his stats afloat. We're not going to pay up for last year's stats, but we're not really calling for a cratering either — Prescott's rank is a reflection of how deep this position is.

STATISTICAL CONSIDERATIONS:

Dalton had a losing record for the first time in his six-year career in 2016, but don't pin the blame on him — his passer rating was the second-highest of his career, and he also had his lowest interception rate. His YPA was slightly higher than his career norm. A suspiciously low 3.2 percent touchdown rate was a combination of bad luck and key injuries — A.J. FANTASY SPIN: Dalton would probably be in for a major step forward simply by getting Green and Eifert back for full seasons, but also keep in mind Cincinnati drafted for offense (WR John Ross, RB Joe Mixon). This is easily the most loaded offensive group Dalton has played with, and after the sure things are off the board, he's one of the most intriguing middle-round upside plays. FANTASY SPIN: Cousins is once again playing for a contract, as he and the Washington front office couldn't come together on a long-term deal. Head coach Jay Gruden is one of the more underrated offensive designers, but Cousins will have to prove he can get it done without field stretcher DeSean Jackson (Terrelle Pryor is a different type of player). STATISTICAL CONSIDERATIONS: There's an obvious disconnect from fantasy football and real football, and Taylor's situation with Buffalo reflects that. Although he has finished QB14 and QB8 in the last two seasons, the Bills have refused to anoint him as a long-term solution. In Buffalo's defense, Taylor's efficiency declined in a number of areas last year — a big drop in YPA, a league-high 42 sacks, a notable drain in touchdown rate. A key part of his

(QBs with a minimum of 200 attempts)

STATISTICAL CONSIDERATIONS: Smith is the poster child of sorts to those who prefer two-QB or superflex formats; he's not good enough to be a consistent starter in the more standard one-QB world. Smith has finished somewhere between 13 and 29 on the quarterback tote board since becoming a regular; last year he was No. 22. He padded his bottom line with a handy five rushing touchdowns, though he lost 73 percent of his rushing yards from the previous season.

FANTASY SPIN: The Chiefs drafted Smith's successor in first-round quarterback Patrick Mahomes, though the baton pass isn't expected to happen this year. Smith has just one season with 500 pass attempts, and he's thrown a modest 53 TD passes in the past three years. Even in secondary formats where multiple QBs are desired, he doesn't have enough upside to move the needle.

STATISTICAL CONSIDERATIONS:

Volume can be a handy deodorant in fantasy football, and it helped Flacco last year — he threw a whopping 672 passes, easily a career high. Alas, the workload didn't lead to anything wonderful, as he had the lowest YPA and touchdown rates of his career. Durability is one of the things that comes standard here; Flacco has played a full season in eight of nine years.

FANTASY SPIN: Baltimore desperately needed to add an outside playmaker or two on offense, but it was shockingly reluctant to do so in free agency or the draft. Unless you're a major believer in Breshad Perriman's Year-2 potential, it's hard to imagine Flacco being anything more than a fantasy backup. He's never cracked the top 10, and he's been a mediocre 26th and 20th the past two seasons.

2017 ROOKIE QUARTERBACKS

MITCHELL TRUBISKY

TEAM: Chicago
HT: 6-3 WT: 220 40 SPEED: 4.67
COLLEGE: North Carolina DRAFT: 1 (2)

"As far as physical gifts, he's got everything," said one scout. "He's got poise, and he works hard. He's the best of the quarterbacks who came out. You just wish he had played more in college."

"He has a ceiling to be a solid starter like Alex Smith," said another scout. "There's a smaller variance between his floor and ceiling than Patrick Mahomes. He does some good things, but he doesn't get me excited. If he makes it, I could see him anywhere from the 10th to the 20th best quarterback in the league."

"He can sling the ball, but his feet get a little bit happy under pressure," said a third scout. "He is a rhythm passer. But I don't think he's a quick mental processor. That's going to take some time."

MITCHELL TRUBISKY

PATRICK MAHOMES

TEAM: Kansas City
HT: 6-3 WT: 230 40 SPEED: 4.80
COLLEGE: Texas Tech DRAFT: 1 (10)

"He pulls plays out of his butt like you wouldn't believe," said one scout. "He believes in his arm so much that it's a problem sometimes. I'm not comparing him to Aaron Rodgers, but that natural sense of making plays when they break down is unusual. Now, can he make plays from structure?"

"He is a great kid and willing to do everything," said another scout. "But he played in that gunslinger spread offense at Tech that no quarterback has ever succeeded from at the next level, really."

"He has the best arm of the group, but he plays crazy," said a third scout. "He's reckless. He might have 20 plays in a game where you go, 'What are you doing?' "

DESHAUN WATSON

TEAM: Houston
HT: 6-2 WT: 221 40 SPEED: 4.66
COLLEGE: Clemson DRAFT: 1 (12)

"He's the top guy in this group for me," said one scout. "He played the best on the biggest stages. His best thing is leadership. He's a winner. But he has to develop into a pocket passer."

"You can say he's better than Dak Prescott," said another scout. "Total winner. Highly poised. Top intangibles. But he's going to need a lot of work, like all these guys from the spread offense. His throwing mechanics are below average, and he made some really bad throwing decisions."

"He's got a good arm, but he's got to be a better progression reader," said a third scout. "He makes some throws you question."

DeSHONE KIZER

TEAM: Cleveland
HT: 6-4 WT: 233 40 SPEED: 4.83
COLLEGE: Notre Dame DRAFT: 2 (52)

"He should be the top guy, but for some reason he's not," said one scout. "He's smart, has good size, a good arm, is a pretty good athlete. Everything lines up, but doesn't connect. Is there a fatal flaw somewhere? Maybe the game doesn't slow down for him."

"Really good arm strength," said another scout. "Can crank the ball through the tight windows. He'll stand tall in the pocket. But when he's under pressure, he doesn't move in the pocket as well as you would like."

"He looks the part and all that, but he's not as good as he should be because he's not committed to the game," said a third scout. "He's committed to building a brand. He wants all the things that come with being a starting quarterback, but doesn't want to put in the work."

DAVIS WEBB

TEAM: New York Giants
HT: 6-5 WT: 229 40 SPEED: 4.79
COLLEGE: California DRAFT: 3 (87)

"He's got a lot of things you want," said one scout. "He's big; he can throw it; he moves around good enough; he's competitive. He has the potential to be a starter."

"He melted as the season went on last year," said another scout. "You never like to see that, but he was playing in a junk offense. He's a better athlete than people realize."

C.J. BEATHARD

TEAM: SAN FRANCISCO
HT: 6-2 WT: 215 40 SPEED: 4.92
COLLEGE: Iowa DRAFT: 3 (104)

"He'll end up being one of the best backup quarterbacks in the league," said one scout. "As a starter, he doesn't do a lot of things by himself. But he's got a good arm, he's accurate, and he has intangibles. Athletically, you want a little bit better."

"He'll play 10 years as a second- or third-team quarterback," said another scout. "He's smart; he's got some football genes — Bobby Beathard is his grandfather — and he's a tough kid. The other team beat the crap out of him in their bowl game, and he kept coming back."

FANTASY SPIN: Bradford was brought to the Vikings at the last minute last year, an 11th-hour replacement for Teddy Bridgewater. This summer, Bradford gets a full camp to get the handle of things. Minnesota has made improvements with the offensive line and the skill players (no one will miss Adrian Peterson, who did nothing last year, anyway). But Bradford has just one fantasy finish inside QB20 — he's an ordinary depth play in offshoot formats, and you can ignore him altogether if your league requires just one starter.

STATISTICAL CONSIDERATIONS:
Glennon scored a shocking contract from the Bears in free agency — $18.5 million is guaranteed — but Chicago undermined the decision a few weeks later, trading up to draft Mitchell Trubisky. Glennon was a slightly-below average quarterback during his Tampa Bay experience, though most of that playing time came way back in 2013. The Bears have adequate skill talent, but the line needs help. With Trubisky unlikely to get the call immediately, Glennon will get an extended chance to show the big contract wasn't a mistake. STATISTICAL CONSIDERATIONS:
Given what was around him in 2016, Kessler did a remarkable job with his eight starts. A 92.3 rating is notable for any first-year player, and Kessler threw only two interceptions. The Browns drafted DeShone Kizer as a possible quarterback of the future, but he was merely the 52nd overall pick, and is seen as a project by most scouts.

STATISTICAL CONSIDERATIONS: Goff's rookie experience wasn't just horrible, it was historically horrible. Of the 95 post-merger rookie quarterbacks who have thrown at least 200 passes, only Ryan Leaf had an indexed-adjusted QB rating lower than Goff's 61 last year (100 is average). If you're an optimist, you'll note some Hall of Famers — Terry Bradshaw and Troy Aikman — didn't do much better than Goff. G/C	Stefen Wisniewski (16/6)
G/T	Matt Tobin (12/1, IR)
T	Halapoulivaati Vatai (7/6)

The Eagles were 3-1 last season when Johnson got hit with a 10-game suspension for a PED violation. They went 2-8 in that span, and upon his return to the lineup won their final two games, making Johnson's personal record 5-1. His presence on the line cannot be understated. The rest of this group is solid, too. The only question is whether Seumalo, Warmack, Barbre or Wisniewski will be the starter at left guard.

The loss of wide receivers Pierre Garcon and DeSean Jackson hurts the Redskins, but having a consistent line should help. All five starters are back, and they made a combined 60 of 80 starts. Long and Moses, both 2014 third-round draft picks, have developed into productive players. Williams is one of the NFL's best left tackles. The only question is depth.

A sometimes maligned group, this unit played well enough last year — even with Long out half the season because of an injury — to clear paths for running back Jordan Howard. There has been discussion about flipping Long and Sitton at the guard spots. An injury to Grasu that cost him the season opened the door for Whitehair, a 2016 second-round pick. Compton, Kush and Sowell provide solid depth.

The Lions spent a combined $48.5 million guaranteed on unrestricted free agents Lang and Wagner. They believe the left side will be in good hands for a long time with 2016 draft picks Decker (first round) and Glasgow (third). Glasgow is expected to keep Tomlinson on the bench, but the latter will compete for the job in training camp. Aside from Tomlinson, depth could be an issue.

The Packers surprisingly released guard Josh Sitton at the outset of last season, but Taylor, a 2013 undrafted free agent, stepped in and played well. The tackle positions are strong with Bakhtiari and Bulaga, the latter entering his eighth season. The biggest question is at right guard, where T.J. Lang departed for Detroit. Evans, signed as a free agent, is the only option to replace Lang, unless Spriggs shows he can play better than he did in two starts last season.

The line was a mess last season. Five players manned the tackle spots after injuries knocked out Matt Kalil and Andre Smith. Jake Long was signed to help, but he promptly suffered an injury. The Vikings hope unrestricted free agents Reiff and Remmers will be answers. The other hope is that Elflein, a 2017 third-round draft pick, will be good enough at center to bump the steady Berger to right guard. Numerous candidates are fighting for backup jobs.

The retirement of guard Chris Chester prevents the Falcons from having something very rare in the NFL: an entire line returning that started all 16 games the previous season. Stable line play was a huge factor in the team's offensive success. There could be a battle between Schweitzer, a 2016 sixth-round draft pick, and Harlow, a 2017 fourth-round choice, for the job that Chester vacated. Harlow is being moved to guard from his college position of tackle.

Put a question mark after Oher's name at right tackle. He missed the final 13 games of the 2016 season because of a concussion and had not been cleared when offseason workouts began. If Oher is unable to return to form, the contenders for his job will be Williams and Moton, the latter a 2017 second-round draft pick. Matt Kalil (brother of Ryan) was signed to play left tackle, but he underachieved in Minnesota and missed 14 games last season because of an injury.

For new head coach Sean McVay's offense to work, the line has to improve a lot. The question is whether the signing of aging players Whitworth and Sullivan is enough. The latter has had back issues in recent seasons. This is a make-or-break year for Robinson, who is moving to the right side. If he can't handle right tackle, he could move to guard, with Havenstein going back to tackle. Brown, a 2015 third-round draft choice, has not played up to expectations.

The Seahawks continue to tinker with a line that has not performed to championship levels the last two seasons. They are counting on Joeckel to do what he never did in Jacksonville: play well at left tackle. He was moved to guard last season before suffering a season-ending injury. Fant is back on the bench after trying to handle left tackle last year as an undrafted rookie free agent. Ifedi started at right guard as a 2016 rookie and is expected to move to right tackle if Aboushi can handle right guard. Rookie Pocic was a center in college, and also will work at guard and tackle.

Dumped by Miami four years ago for hazing a teammate, Incognito has become the leader of the Bills line. He is one of three returning linemen who each started all 16 games last season, blocking for the league's No. 1 rushing offense. The only starters to miss games were Glenn and Wood, and both are expected to be healthy. Groy and Dawkins should provide good depth, with Dawkins maybe even challenging Mills for the starting role at right tackle.

Some evaluators thought the Dolphins were reaching when they drafted Tunsil in the first round last year. But he emerged as the starter at left guard and played so well that Miami cleared left tackle for him by trading Branden Albert. The question is whether Larsen can prove to be consistent at left guard; don't be surprised if 2017 fifth-round draft choice Asiata challenges for the spot. A healthy Pouncey is vital to the unit. But he is one of the best ever at what he does, and Scarnecchia's return from retirement last season was every bit as important to this team as Tom Brady.

"He's a solid, functional left or right tackle," said one scout. "He'll never overwhelm you with his athleticism or strength or feet, but he'll be a solid player for a number of years."

"Very talented," said another scout. "He's smart, competitive, and a good athlete. He's a run blocker. He's good with his angles. He's aggressive."

"Excellent pass blocker. Quick set, slides, mirrors, range, anchor — really good," said a third scout. "But he's not very powerful, and he isn't really a 'wow' athlete."

CAM ROBINSON (G/T)

"He was a three-year starter at left tackle at one of the premium college programs, and you can certainly see the potential," said one scout. "He had poor upper-body strength last year, coming off shoulder surgery, and I think he started overcompensating and got into some poor habits from a technical standpoint."

"He hasn't got better since his freshman year," said another scout. "He's a right tackle for me. I don't trust him to protect the quarterback. Very, very erratic. Lot of penalties. Up and down play."

FORREST LAMP (G)

TEAM: Los Angeles Chargers
HT: 6-4 WT: 310 40 SPEED: 5.00
COLLEGE: Western Kentucky DRAFT: 2 (38)

"Best O-lineman that I watched last year," said one scout. "He was a left tackle, and did a hell of a job against Alabama and two really good rushers. I really like him as a guard."

"He has intangibles and athletic ability," said another scout, "but was undersized as a left tackle, and that makes me think of a center. He's got that kind of leadership. He's the best interior prospect."

"He might be the toughest guy in the draft," said a third scout. "He probably is maxed out physically, but guys like him play well and hang around for a while."

ETHAN POCIC (G/T)

TEAM: Seattle
HT: 6-6 WT: 317 40 SPEED: 5.15
COLLEGE: Louisiana State DRAFT: 2 (58)

"He's definitely smart enough to play all the positions, so that enhances his value," said one scout. "You want him on your team because if somebody goes down, he can flip and play another spot. Good traits. Good player."

"He's a little tall for center, but I don't think that will keep him from playing there," said another scout. "He'll be a long-time interior player, whether it's guard or center. He's tough, technically sound, aware. Smart player. Got an NFL body."

"He's not an elite physical talent," said a third scout, "but he does have elite size for guard or center. He'll become a mid-level starter, and if he gets on a good team, he'll look better than he really is."

DION DAWKINS (G/T)

"He's a big mauler," said one scout. "He's got some power and tries to finish you. He has some edge issues and is not going to be a great second-level guy. Not a bad athlete. Love his length."

"He's just a big, square dude that I can see walking in and starting from Day One," said another scout. "He's a guard for me, but his arms are long enough that he might be able to continue at tackle."

TAYLOR MOTON (G/T)

TEAM: Carolina
HT: 6-5 WT: 320 40 SPEED: 5.18
COLLEGE: Western Michigan DRAFT: 2 (64)

"He's a big, physical guy," said one scout. "Much better suited for a power run game than a zone scheme. He's not a great athlete, a little bit of a waist-bender, but he can maul you."

"He really showed up well at the Senior Bowl, the Combine and his Pro Day," said another scout. "Every exposure, I felt better about him. Athletically, he tested pretty well."

Scouts' quotes were gathered prior to the NFL Draft. 40 speeds are from the NFL Combine, when available.

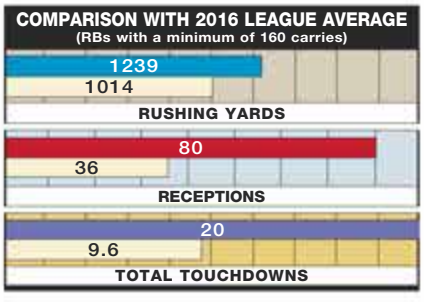
'16	ARI	16	293	1239	4.2	77.4	16	80	879	11.0	4



STATISTICAL CONSIDERATIONS: Johnson led the NFL in scrimmage yards (2,118) and touchdowns (20) last season, plus he led all running backs in targets (120), receptions (80) and receiving yards (879). What else do you really need to know? He was the top scorer at his position by a significant margin in any format, a dominant PPR weapon. If week-to-week consistency is your thing, then you'll note that Johnson topped 100 scrimmage yards in every game until Week 17. He's scored 32 career TDs in 32 games, averaging 4.4 yards per carry and 11.5 per catch. He's absurd.

FANTASY SPIN: There are no holes in Johnson's fantasy game. He never had an off-week last season. Johnson was a yardage and touchdown machine. He was the only back to reach 2,000 scrimmage yards, and his reception total would have ranked 17th among all wide receivers. Johnson is the centerpiece of an excellent offense, fully recovered from the MCL sprain he suffered last January, and he's openly talking about topping 1,000 rushing and receiving yards in 2017. He belongs at the top of your draft board.

STATISTICAL CONSIDERATIONS: Bell very nearly matched David Johnson's per-game fantasy production last season, but a three-week suspension cost him a shot at the scoring crown. Still, he managed to finish with an astonishing 1,884 scrimmage yards in just 12 games, along with nine TDs. Bell caught 75 balls for 616 yards on 94 targets and averaged 4.9 yards per rush. He didn't really slow down in the postseason, running for 357 yards over three games. For his career, he's averaging 128.7 scrimmage yards per game. Ridiculous.

FANTASY SPIN: If you want to draft Bell over Johnson, it's defensible — we're not recommending it, but it's not insane. Bell is a gifted player, still just 25 years old. His injury history is a concern — groin surgery in March, knee surgery in 2015 — and of course we fret about the possibility of yet another (longer) suspension. But he's a full-workload, every-down back tied to a terrific offense, and he's among the best pass-catchers at his position. In any league, he's a clear top-three pick.

STATISTICAL CONSIDERATIONS: All Zeke managed to do in his first pro season was score 16 touchdowns and win the rushing crown by a huge margin — he finished 318 yards ahead of the guy in second. Elliott topped 90 scrimmage yards in 13 of his 15 games, averaging 5.1 yards per carry for the year. His 1,631 rushing yards were the third-highest single-season total ever delivered by a rookie, and he became the seventh player to top 1,500 yards on the ground in his first year. Elliott also led the league with 14 runs of 20-plus yards. He caught only 32 balls on 40 targets, but converted those receptions into 363 yards (11.3 Y/C).

a multi-dimensional offense. It's the perfect setup. Elliott has no significant medical red flags, either. The only fantasy negative is that he was not a big part of Dallas' passing game, ranking 27th among running backs in receptions. STATISTICAL CONSIDERATIONS: This time last year, Gordon was a punchline. He was coming off a rookie season in which he'd failed to score a touchdown on any of his 217 touches, a remarkable feat of ineffectiveness. But in his second season, he was not so TD-challenged. Gordon visited the end zone 12 times over 13 games while rushing for 997 yards and catching 41 balls for 419. He remained an inefficient runner (3.9 YPC), but the fact he unlocked the end zone boosted his value in a big way. He carried the ball 20 times inside the 5-yard line, the second-highest total in the league. Gordon finished as the fourth-highest per-game scorer at his position in 2016.

FANTASY SPIN: Gordon may not be the league's flashiest runner, but he's a quality back who demonstrated clear year-over-year improvement and is tied to a dynamic offense. If it weren't for a late-season PCL sprain, he would have delivered 1,600-plus scrimmage yards. The Chargers are loaded with offensive talent, so scoring opportunities should again be plentiful for Gordon, one of the few backs in the NFL in line for 320 or more touches. Based on situation and team context, he shouldn't fall outside the top eight overall picks.

FANTASY SPIN: Not only is McCoy the centerpiece of Buffalo's offense, but, after Mike Gillislee relocated to New England, he's completely unchallenged for touches. It would be a small surprise if McCoy's workload didn't increase somewhat in 2017. The key, of course, is health. He's dealt with hamstring issues and concussions in recent years, yet still managed to play 15 games last season. All players who handle the ball as often as McCoy present injury risk. If you get a mostly healthy season from Shady, he's a lock for top-eight positional value.

STATISTICAL CONSIDERATIONS: Howard was the best waiver find in fantasy last season, and one of the NFL's most impressive first-year players. He opened the season behind Jeremy Langford on Chicago's RB depth chart, but surged to the top in October and rarely had a quiet week, exceeding 90 scrimmage yards in 11 of his final 13 games. He made only seven visits to the end zone, but you can blame the inept team offense for that. His 87.5 rushing yards per game ranked third in the NFL.

FANTASY SPIN: Had it not been for the phenomenal rookie seasons delivered by Zeke Elliott and Dak Prescott, Howard would have no doubt made a bigger splash on the national scene. Fantasy owners were well aware of his contributions. The Bears used him as if head coach John Fox owned him in a dozen fantasy leagues; Howard's usage seemed largely unaffected by game situation. He's not a wow runner, necessarily, but he earned his Pro Bowl berth in 2016 and is likely to finish among the most heavily utilized backs in the season ahead. Chicago's roster is full of flaws, but the O-line is a solid run-blocking group. Howard is set for another top-10 fantasy campaign.

FANTASY SPIN: Freeman may not receive the full backfield workload for Atlanta, but no one's going to complain about a dynamic player tied to an elite offense who sees 281 touches. One of the keys to his fantasy value, clearly, is the volume of work he receives near the goal line. Unless you think the Falcons are going to take a massive backward step from last year's elite production (33.8 PPG), you have to like Freeman to again reach double-digit TDs and at least 1,350 scrimmage yards. He's a fringe first-rounder in standard leagues who merits a small bump in PPR.

Ajayi saw at least 18 touches in every game after his October takeover, so there are no volume concerns here. STATISTICAL CONSIDERATIONS: Lacy has had persistent weight issues over his four pro seasons and reportedly weighed 267 pounds this spring during his free-agent visits. It's an odd problem for a featured back in the NFL, and Lacy has weight incentives built into his new contract with Seattle. He was having an efficient 2106 season for the Packers (5.1 YPC), but a significant ankle injury ended his year after just five games. He began his career with back-to-back 1,100-yard, double-digit TD seasons, so we know he can function as an upper-tier fantasy back. Seattle has been a run-heavy team under head coach Pete Carroll, but last year the Seahawks' running game ranked 25th in the league, averaging 99.4 YPG and 3.9 YPC. A shaky O-line didn't help, nor did a collection of pedestrian runners.

Sometimes, a change of scenery is all it takes. Murray bounced back in a big way from his horrid 2015 season in Philadelphia. After a year in which he averaged only 3.6 YPC for the Eagles, he carried 293 times for the Titans, rushing for 1,287 yards (4.4 YPC) and nine TDs. He also caught 53 of his 67 targets for 377 yards and three spikes. Vintage Murray, basically. When Tennessee approached the goal line, Murray had a huge role. FANTASY SPIN: When the Titans used an early pick on Derrick Henry in 2016, most assumed he and Murray would form a punishing committee. Instead, DeMarco was the clear featured runner, out-carrying Henry 293 to 110. Head coach Mike Mularkey has repeatedly indicated that Murray will remain the primary back, and we should be willing to take him at his word. Murray is a high-mileage runner who turned 29 in February, so there's a decent chance we've already seen his best. Still, he's given us reason to think he can deliver at least one more high-volume season. In PPR formats, bump him above Jay Ajayi and Eddie Lacy.

Head coach Bill O'Brien admitted to overusing Miller early in the year — he averaged 28 touches per game in September — so his workload should be dialed back in 2017. But, again, that's not necessarily a bad thing. Rookie D'Onta Foreman is no great threat to Miller, so don't sweat his arrival. Miller should see 275-plus touches in an improved offense. He's not an ideal RB1, but it won't be a shock if he cracks the top 10 scorers by the end of the season.

STATISTICAL CONSIDERATIONS:
So, um … what happened? Gurley was spectacular as a rookie in 2015, despite coming off a significant knee injury. He had no problem whatsoever with the buzzsaw division schedule in the NFC West. But last year was a disaster. His yards per carry cratered (3.2), as he rushed for just 885 yards on 278 totes. His reception total jumped from 21 to 43, so perhaps he didn't disappoint the PPR community quite as much as standard owners. Still, he was mostly miserable — an impatient runner, burdened by a poor O-line and ghastly quarterback play. Gurley had only two carries of 20-plus yards after delivering 11 in 2015.

Gurley's setup was horrible last season as the Rams ranked last by a mile in both total net yardage (262.7 YPG) and points (14.0 PPG). L.A. is basically running it back this year with a similar cast of offensive players, so let's hope new head coach Sean McVay is a difference-maker. FANTASY SPIN: It seemed unlikely Blount could find a landing spot that would allow him to retain significant fantasy value, but he pulled it off. Philly is the perfect home. Blount should own the early-down work, while Darren Sproles functions in his usual capacity as a dynamic receiving threat. The Eagles' offense isn't as explosive as New England's, of course, so don't expect another 18 spikes from Blount. But eight? Ten? Twelve? A healthy touchdown total is very much in play. Draft Blount with confidence in any format, but knock him down a tier or two in PPR.

STATISTICAL CONSIDERATIONS: When we last saw Lynch … well, he was riding a bike in Scotland, building homes in Haiti, and generally behaving as an eccentric yet socially responsible world traveler. And now, at 31, he's back in our fantasy lives. In Lynch's final season in Seattle, injuries limited him to only seven games and he averaged 3.8 yards per carry. Not great. But he's joining a team that ranked sixth in the NFL in rushing last season (120.1 YPG) and he'll be running behind a dominant offensive line. He should own the goal-line carries, too.

FANTASY SPIN: Honestly, your guess is as good as ours. Lynch is a Canton-quality running back who landed in a terrific spot. Latavius Murray managed to score 12 touchdowns for Oakland last season, so it's not out of the question that a healthy Lynch can deliver double-digit TDs as well. Just remember that he's on the wrong side of 30, is coming off a year without serious training, and has 2,144 career carries on his legs. You can't draft him as if he's the 2013 version of Beast Mode.

STATISTICAL CONSIDERATIONS: For the first month and a half of the 2016 season, Ware was a wrecking ball, an upper-tier fantasy asset. He averaged 129.5 yards from scrimmage over his first six games, crossing the goal line three times. Ware suffered a concussion in Week 8, however, and was never quite the same after returning in Week 10. He didn't reach 100 scrimmage yards in any week during the second half of the season, and dealt with a rib injury in December. He averaged just 3.6 YPC in his final eight games.

FANTASY SPIN: Ware is the presumptive featured back in Kansas City, but it's worth noting that the Chiefs used a third-round draft selection on Toledo's Kareem Hunt, an intriguing prospect. We can interpret this addition as something less than a full endorsement of Ware, long term. Let's not count on Spencer holding down an every-series role from start to finish. Draft him expecting not much more than last year's totals. He's a capable receiver, so no need to downgrade him in PPR.

STATISTICAL CONSIDERATIONS: Crowell established career highs in nearly every category that matters last season. He more than doubled his single-season best in catches, and his average yards per carry jumped a full yard from 2015. Crowell has appeared in every game in each of the past three seasons, so he doesn't present unusual injury risk.

FANTASY SPIN: The Browns ignored the running back position on draft day, so this team is planning to roll with Crowell and Duke Johnson once again — as it should, because the pair was awfully good in 2016. Crowell and Johnson combined for 2,143 yards, and both averaged close to 5.0 YPC. The primary concern for Crowell owners will be that game-flow can get away from him — that's life as the primary early-down back on a bad team. He'll have days when the matchup seems OK, yet he finishes with nine carries because the Browns slip into an early deficit. However, his newfound receiving role should help smooth out those otherwise rough fantasy days.

STATISTICAL CONSIDERATIONS: Three years into Hyde's NFL career, we're still waiting for him to play a full season. It was 13 games in 2016, seven the year before and 14 as a rookie. It's safe to say that durability remains a huge concern. Hyde ran for a career-high 988 yards last season and found the end zone nine times, though all six of his rushing TDs occurred in the first five games.

FANTASY SPIN: Stylistically, Hyde seems a weird fit for head coach Kyle Shanahan's zone running scheme. The Niners traded up and used a fourth-round pick

to acquire Utah rookie Joe Williams, a rugged back who Shanahan reportedly wanted desperately. That probably wasn't a great sign for Hyde, who has a path to value in 2017 but cannot be relied on to play a full 16-game season. Plus, he's a low-volume receiver. The best advice is to expect little — don't draft him as your first RB.

STATISTICAL CONSIDERATIONS:

Peterson is already on the short list of the greatest running backs in NFL history. But you're not drafting his full career, are you? At this stage, he's a 32-year-old back who was limited to three games last season after suffering a meniscus tear — and in those three appearances, he averaged 1.9 YPC behind a terrible O-line. He's carried 2,418 times in the NFL, so he's lost plenty of tread from the tires. He joins a committee backfield in New Orleans and a league-average rushing attack. The Saints ranked 19th in total rushing attempts last season (404) and 16th in rushing yards (108.9 YPG).

FANTASY SPIN: We're dealing with a rare player, so it wouldn't be much of a surprise if AP delivered one last useful fantasy season, and it's nice to see him tied to an elite QB and a high-scoring offense. Peterson figures to split touches with Mark Ingram, depressing the fantasy value for both. New Orleans has typically featured multiple runners under head coach Sean Payton, with no one individual dominating the goal-line work, so Peterson's days as a 280-plus carry runner are very likely behind him. But it's not crazy to think he can handle 190-210 carries in 2017. He deserves RB2 status on draft day, though he loses a round or two of value in PPR formats.

He also caught 44 balls for 348 yards on 56 targets, stabilizing the running back position for Green Bay after injuries claimed Eddie Lacy and James Starks. It's important to note that 162 of Montgomery's rushing yards came in a single week against Chicago's miserable run defense. That was the only game in which Montgomery saw double-digit carries (16).

FANTASY SPIN: No one should think of Montgomery as a workhorse back. In a typical week as Green Bay's primary RB, he was seeing 11-14 touches per game. The Packers selected three running backs in the 2017 draft, so Montgomery will face immediate competition. The biggest threat to his workload will likely be BYU fourth-rounder Jamaal Williams, who underwhelmed at the Combine yet authored an impressive four-year collegiate career. Montgomery should retain the starter's role, for what it's worth, while leading this team's backfield in touches.

STATISTICAL CONSIDERATIONS:

Ingram achieved career highs in rushing yards, yards per carry and touchdowns last year, and managed to play all 16 games for the second time in his six seasons. Along the way, he was briefly benched in favor of Tim Hightower due to ball-security issues. Thus, it's fair to say it was an up-and-down year for Ingram. He's caught 96 balls on 117 targets over the past two seasons, shedding his early reputation as a player who couldn't help on passing downs.

FANTASY SPIN: After Ingram produced the finest statistical season of his career, his reward was a double-dose of competition for his job. The Saints signed Adrian Peterson as something more than a complementary back, and drafted the hyper-athletic Alvin Kamara, perhaps to fill a Reggie Bush-style role. Ingram will need to earn every touch he receives this season. It's tough to like his odds to repeat last season's production. If you draft him, let the basis be 150-170 carries and 35-40 receptions.

Coleman made the most of his limited opportunities last season, scoring 11 touchdowns and gaining 941 scrimmage yards on only 149 touches. He gained an extraordinary 13.6 yards per reception, the highest per-catch average at his position. If you think the Falcons can repeat as the league's highest scoring offense (33.8 PPG), then you're probably bullish on Coleman. He's missed seven games over his two seasons, so health will be a constant concern.

FANTASY SPIN: If you have to own a running back who has only a supporting role on his team, at least make sure to get a guy in Coleman's situation. When healthy, he's a lock for 10-14 touches per week. If Atlanta remains an offensive juggernaut in 2017, then Coleman's modest workload should be enough to produce RB2-level fantasy value. He's a dangerous runner with terrific long speed, and a more-than-capable receiver. But there's little chance Coleman will emerge as the Falcons' lead back while Devonta Freeman is in the mix.

FANTASY SPIN: No other running back in NFL history has outlasted more players who were drafted to replace him than Gore. He is a freak in terms of durability, an extreme outlier. Analysts have been predicting his decline for over half a decade, but he stubbornly keeps churning out 1,000-yard seasons. Now 34, he will eclipse 3,000 career carries at some point in September. The Colts used a fourth-round draft pick on USF all-purpose star Marlon Mack, so he's the latest challenger to Gore. Perhaps this will be the year he slips, though the most likely scenario is another season full of 64-yard rushing performances, with Gore grinding his way to another 1,000-yard campaign. He'll never carry your team in any given week, but he's a steady source for 8-12 fantasy points.

But a knee injury ended his year in October, leaving the primary rushing duties to the thoroughly unimpressive Devontae Booker (3.5 YPC). Anderson has been reasonably productive during his time in Denver, but over the past two seasons hasn't matched his brilliant second-half performance from 2014. That year, he averaged 132.1 scrimmage yards over his final eight games, breaking the plane 10 times.

FANTASY SPIN: Anderson enters camp in a three-man competition for touches. The addition of Jamaal Charles via free agency was a sure sign that Denver's front office wasn't thrilled with a Booker-CJA combo. As a relatively productive incumbent, Anderson is a slight favorite to capture something like 60 percent of the backfield work for the Broncos. This team's combination of shaky quarterback play and a poor O-line creates a bad rushing environment. If you think of Anderson as a flex with benefits, you won't overpay.

FANTASY SPIN: If you're reading the Paul Perkins blurb while drafting a team, then things are obviously not going well. He's not the ideal RB2 for any fantasy roster, but at some point you start eyeing players with well-defined roles. Perkins opens the season as the clear early-down runner for New York, with Clemson rookie Wayne Gallman behind him on the depth chart and Shane Vereen in a situational role. No question, Perkins has a path to an unspectacular 1,000-yard season. He won't single-handedly lead you to any wins, but he can still help the cause. He was used only minimally as a receiver last season (15 receptions), so he isn't any sort of special PPR asset.

RECEIVING SKILLS	6

FANTASY SPIN: As much as we'd like to project what Powell might do with a full featured workload, we can't wish away Matt Forte. He's still a thing. Forte is also 31, well into the decline phase and coming off an arthroscopic procedure on his knee. Powell is the better runner at this stage, likely to lead New York's backfield in touches in 2017. But we can't promise much more than a 55/45 split when both players are healthy. And then we have to deal with the impact of one of the worst quarterback situations in recent NFL history. Powell deserves a serious bump in PPR formats, but it's difficult to see a path to a useful touchdown total.

STATISTICAL CONSIDERATIONS: Fantasy analysts wouldn't stop drooling over Kenneth Dixon last season, but it was West who led the Ravens in carries, rushing yards and rushing scores. West had five carries of 20-plus yards while Dixon had one. He out-produced Dixon as a receiver, hauling in 34 balls for 236 yards on 45 targets. Dixon finished at 30 catches for 162 yards. It may feel as if West has been around forever, but he's only 26.

FANTASY SPIN: Dixon is suspended for the first four games of 2017 for violations of the league's PED policy, so West has no challengers for the early-down rushing workload. Expect him to produce a useful September, and to retain the top spot in this backfield after Dixon returns. Baltimore didn't address the running back position in the draft, instead adding Danny Woodhead via free agency. Woodhead is a passing-down specialist; West will be the team's primary ball-carrier. Don't be surprised if he produces at an RB2 level in both standard and PPR formats.

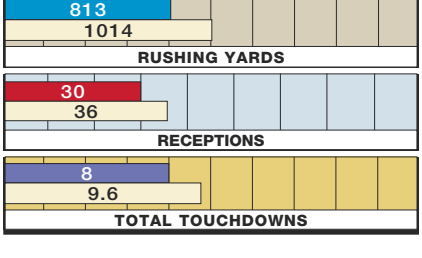
COMPARISON WITH 2016 LEAGUE AVERAGE
(RBs with a minimum of 160 carries)



STATISTICAL CONSIDERATIONS: When Forte was healthy in 2016, the Jets rode him mercilessly hard. He opened the year by handling 59 touches over two games, in the span of five days. It's no surprise that he broke down in the end — he's a 31-year-old running back, after all. But he managed to gain 1,076 scrimmage yards over 14 games, topping 90 yards six times. Forte will remain a factor, though we note that he's averaged less than 4.0 YPC in two of the past three seasons.

FANTASY SPIN: Forte is in the twilight of an excellent career, but was a big part of the Jets' offense last year at age 30. He's reached 1,000-plus scrimmage yards in each of his nine NFL seasons, so we shouldn't expect him to go quietly. He's one of the most capable receiving backs of his era, and you can assume he'll remain a relevant player in PPR formats. You can expect a great deal of pre-draft enthusiasm about Bilal Powell this year, but Forte will surely retain a substantial role.

STATISTICAL CONSIDERATIONS: Hill has been a rough watch for two seasons. He averaged just 3.8 YPC last year and 3.6 in 2015. His fantasy value has been saved by volume (222 carries last season) and goal-line work. Hill ranked sixth in carries inside the 10-yard line with 25, finishing with nine TDs. What They're Saying About the

2017 ROOKIE RUNNING BACKS

LEONARD FOURNETTE

TEAM: Jacksonville
HT: 6-0 WT: 228 40 SPEED: 4.51
COLLEGE: Louisiana State DRAFT: 1 (4)

"He's a freaking beast," said one scout. "I'm not saying he's Earl Campbell, but he's got power. I'm not saying he's Bo Jackson, but when you see this guy roll at his size and strength, wow! Todd Gurley could hit it and he could run, but this guy is more powerful."

"He's rare with his size and speed, and ability to run over people," said another scout. "But I worry about him long-term. He's an erect runner, and he's going to take some punishment. He's not elusive."

"The more I watched him, he can't create at the line of scrimmage," said a third scout. "He just runs over people. The last guy that had that same issue was Darren McFadden."

CHRISTIAN McCAFFREY

TEAM: Carolina
HT: 5-11 WT: 200 40 SPEED: 4.48
COLLEGE: Stanford DRAFT: 1(8)

"He's the second-best back coming out, behind Fournette, who is head and shoulders above everybody," said one scout. "He's subtle with how good he is. Even though he's had all the acclaim, he's still really good."

"He's a mismatch guy, and when they get in the league, they make hay," said another scout. "If he moves out to the edge, you might have your 'sam' backer on him. The other thing is, you don't have to worry about the kid. He has been prepared for the NFL since he was born. When you get guys with dads that played in the league, they've been told all their lives to compete."

"I'm a little skeptical," said a third scout. "He didn't dominate as much last year as he did sophomore year. Why is that? What's the value of a third-down back and return specialist?"

DALVIN COOK

TEAM: Minnesota
HT: 5-10 WT: 210 40 SPEED: 4.49
COLLEGE: Florida State DRAFT: 2 (41)

"I absolutely love the guy," said one scout. "He can take over a game. He can score from any spot on the field. What makes him special is his first 10 yards. His acceleration rate is awesome. Good enough hands. Pound for pound, I think he's the best all-around back I've ever scouted."

"He's a small back," said another scout. "Ran 4.5, 30-inch vertical — where's the explosive dynamic? And he has questionable makeup."

JOE MIXON

TEAM: Cincinnati
HT: 6-1 WT: 228 40 SPEED: 4.47
COLLEGE: Oklahoma DRAFT: 2 (48)

"He's my best back in this group, by far," said one scout. "He's Adrian Peterson who returns kicks. Great receiver, not just a good receiver. He can line up wide or as a slot. He's a bigger, better Ezekiel Elliott. He can do more."

"Someone who is succeeding with his style is the guy in Arizona, David Johnson," said another scout. "This kid has power and speed, and he is really a quality receiver. He's the type of guy you can leave on the field in pretty much any situation."

Scouts' quotes were gathered prior to the NFL Draft.
40 speeds are from the NFL Combine, when available.

"Pass protection is an area he will need to continue working on," said a third scout. "It's not from a lack of trying, just technique. He's a big, strong dude. He can do it."

ALVIN KAMARA

TEAM: New Orleans
HT: 5-10 WT: 215 40 SPEED: 4.56
COLLEGE: Tennessee DRAFT: 3 (67)

"I'm not all in on him," said one scout. "He's a small back that ran 4.56 — people keep glossing over that. He's going to be a good change-of-pace, third-down receiving option out of the backfield. But I don't see a guy that you want on the field for three downs."

"He's in the Christian McCaffrey-type role," said another scout. "McCaffrey has done it longer; Kamara has had limited carries. He couldn't even start on his own team, but he's talented."

KAREEM HUNT

TEAM: Kansas City
HT: 5-11 WT: 216 40 SPEED: 4.62
COLLEGE: Toledo DRAFT: 3 (86)

"If he was playing at one of the SEC schools, the whole world would know about him," said one scout. "But I didn't have the guts to give him higher than a third-round grade, given the competition. He's seldom tackled by the first man, shows good balance, is an effective receiver out of the backfield."

"He's a banger with the ability to drop his hips and move laterally," said another scout. "He's really good in blitz pickup. Really showed well at the Senior Bowl. He's grown to where I'm comfortable with him, but he's not special enough to be the guy."

D'ONTA FOREMAN

TEAM: Houston
HT: 6-0 WT: 233 40 SPEED: 4.47
COLLEGE: Texas DRAFT: 3 (89)

"He's a big guy that thinks he's a finesse running back," said one scout. "He's just not an aggressive runner. And he's poor in the passing game. He can't pass-block me."

"He's very similar to Samaje Perine from Oklahoma, except that Foreman ran fast at the Combine, which was a surprise," said another scout. "But he's not a starter. His success in college came in a spread offense, with zone reads and big holes."

there's no reason to think Detroit views him as an every-down runner, either. Draft him expecting no more than 200 touches and 5-7 touchdowns.

STATISTICAL CONSIDERATIONS:
Murray wasn't particularly efficient last season, averaging 4.0 YPC behind an outstanding Oakland offensive line. Touchdowns saved his fantasy season, however, as he made 12 house calls on 195 carries, rushing for 788 yards. Murray received the fourth-most carries inside the 5-yard line (17) and made the most of 'em. But he's joined a team with a far less impressive O-line, and he'll be competing for touches with second-round rookie Dalvin Cook.

FANTASY SPIN: Murray isn't a flashy runner, and for a big back, isn't unusually powerful. All things considered, this is a fairly ordinary back by NFL standards. It's tough to believe he can thrive behind an unimpressive Vikings line. Toss in the competition for carries from Cook and you have a messy situation involving uninteresting players in a bottom-third offense. No one should embrace this backfield.

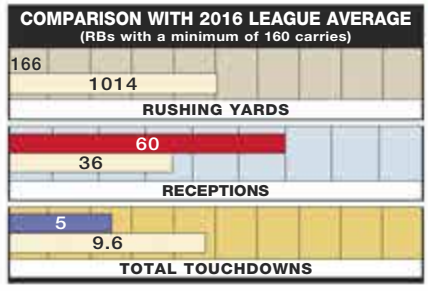
COMPARISON WITH 2016 LEAGUE AVERAGE
(RBs with a minimum of 160 carries)



STATISTICAL CONSIDERATIONS:
White was an afterthought as a runner last season, carrying 39 times for 166 yards and no scores over 16 games. But he was a critically important receiving option for Tom Brady, as he caught 60 passes for 551 yards and five spikes on 86 targets. As you might recall, White was at his absolute best in the season's biggest game, gaining 139 scrimmage yards and scoring three times in the Super Bowl (and getting robbed in MVP voting). White has caught 100 balls for 961 yards over the past two years — he's a serious asset in PPR.

FANTASY SPIN: The Patriots have a crowded backfield, but White's role is well established. He's a terrific receiving back who finished 2016 as the third-most heavily targeted RB in the league (86). White's role in the ground game will be minimal and he has almost no path to a significant yardage total. Basically, he's a format-dependent player. In PPR, he should be 10 spots higher in the ranks.

COMPARISON WITH 2016 LEAGUE AVERAGE
(RBs with a minimum of 160 carries)

STATISTICAL CONSIDERATIONS: At this stage, entering his age-34 season, Sproles is a well-known fantasy commodity. He continues to churn out useful PPR seasons, routinely finishing among the position leaders in targets and receptions. Despite his size (5-foot-6), Sproles is a big part of the red-zone plan for Philadelphia; he handled 18 carries inside the 20 last season and saw 13 targets.

FANTASY SPIN: We can say with confidence that Sproles is in line to see 70 targets in a healthy season, and he's clearly a good bet to catch 50-plus while accounting for 800 or so scrimmage yards. He's no threat to LeGarrette Blount's role, and Blount is no threat to Sproles. If Carson Wentz makes even a small leap forward in his second season, the Eagles' offense has a chance to be exceptionally fun for fantasy purposes. Sproles should retain his longstanding PPR appeal.

'16	DET	10	92	357	3.9	35.7	1	53	371	7.0	5

STATISTICAL CONSIDERATIONS: Wrist injuries limited Riddick to 10 games and 728 scrimmage yards last season, but he still managed to finish among the target leaders at his position, catching 53 balls on 67 chances for 371 yards and five scores. He remains a big part of the game plan when Detroit is near the end zone, as he saw six targets and took five handoffs inside the 10. Riddick isn't the most dynamic runner; he averaged 3.9 YPC last season and has never topped 4.0.

FANTASY SPIN: Like various other players ranked here in the 30s, Riddick is a guy you want exclusively in PPR leagues. There is little to suggest he should ever receive a significant number of early-down carries. Riddick's game relies on short-range receptions, and he has a known role in Detroit that gives him clear value in reception-leaning fantasy formats. He's coming off surgery on both wrists, but there's no reason to think he won't be ready for camp.

STATISTICAL CONSIDERATIONS: Woodhead was limited to only two games last season due to an ACL tear, |but should be near full health by opening week. He is only one season removed from an 80-catch, 755-yard receiving campaign with the Chargers and is one of the league's most reliable pass-catching backs. He should own the early season passing-down role in Baltimore's backfield, with Kenneth Dixon suspended for four games due to a PED violation.

FANTASY SPIN: It's tempting to say we know what we're getting with Woodhead, since he's been a useful PPR back at multiple NFL stops. But he's also 32 and coming off a significant injury. Don't be surprised if he's something less than the vintage version. Nonetheless, Woodhead's role should be secure in Baltimore, at least until Dixon returns from suspension. Draft Woodhead late in PPR leagues. In standard formats, you can leave him alone.

Over Kelley's final nine games, he rushed for 601 yards on 151 attempts (4.0 YPC) and crossed the goal line six times. He wasn't much more than an afterthought as a receiver, however, catching 12 passes for 82 yards.

FANTASY SPIN: Washington spent an early fourth-round pick on Oklahoma's Samaje Perine, a punishing back with a terrific collegiate resume, so Kelley will face serious competition for carries. The guess here is that Perine overtakes Kelley, perhaps during the preseason. There's a very good chance that Kelley will have only a handcuff/rotational role in 2017. Draft accordingly.

STATISTICAL CONSIDERATIONS: Henry had a fine rookie season on a per-carry basis, running for 490 yards and five touchdowns on 110 attempts (4.5). But if you were expecting the former Heisman winner to force a job-share with DeMarco Murray, then you were bitterly disappointed. Murray dominated the backfield touches for the Titans, handling 346 to Henry's 123. Entering the 2017 season, there's no reason to believe Murray will cede carries.

FANTASY SPIN: Head coach Mike Mularkey said in February that "DeMarco Murray is the guy" in Tennessee's backfield, so don't expect a huge second-year surge from Henry. If both backs remain healthy, Henry will have only a supporting role. It's a remarkable luxury for the Titans to have a 6-3, 247-pound hammer to use as a rotational runner. If Murray is forced to miss time due to injury, Henry will be an intriguing fantasy play in any format.

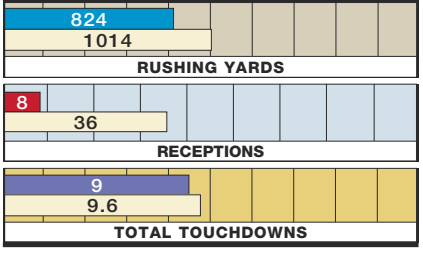
COMPARISON WITH 2016 LEAGUE AVERAGE
(RBs with a minimum of 160 carries)



STATISTICAL CONSIDERATIONS: Stewart spent the best seasons of his career stuck in committee with DeAngelo Williams, but was invariably quite good when given a full-time role. He carried fantasy clubs to titles in the final weeks of 2009, for example, delivering four 100-yard efforts over his final five games. But that's the past. Last year, he averaged 3.8 yards per carry. He crossed the goal line nine times, so he was useful to fantasy owners, but he's clearly past his peak. He hasn't appeared in more than 13 games in any of the last five seasons, so injuries are a worry.

FANTASY SPIN: Christian McCaffrey is the Panthers' back to own, in any format. It's possible that J-Stew will retain an inside-the-5 role, but he'd still have to share short-yardage duties with Cam Newton. McCaffrey is an electric back, a huge upgrade for the Panthers. There's simply no way the team would use the No. 8 pick on a running back, then toss him into a committee with Stewart.

OFFENSIVE Schemes

By Jim Thomas

A look at how the 32 NFL teams deploy their offenses and draw on their skill players.

AFC EAST

Buffalo BILLS

2016 record: 7-9
2016 rankings: 16th (yards), T-10th (points)
Key offensive coaches: Rick Dennison (OC), David Culley (QB)

With a defensive-oriented head coach in Sean McDermott, it's important that the new Bills staff has plenty of experience on the other side of the ball in Dennison and Culley. Their roots are in the West Coast system, with Dennison getting his start under Mike Shanahan, while Culley had been with Andy Reid forever. Play-action and rollouts should play to QB Tyrod Taylor's strengths.

Miami DOLPHINS

2016 record: 10-6
2016 rankings: 24th (yards), 17th (points)
Key offensive coaches: Adam Gase (HC), Clyde Christensen (OC)

Despite his reputation as a quarterback whisperer, Gase provided another reason why he's considered one of the league's brightest young minds. Namely, the ability to alter his scheme to best utilize his personnel. The result was a surprisingly strong running game propelled by the totally unexpected breakout year of Jay Ajayi. In Year 2, Gase needs to get back to whispering — in QB Ryan Tannehill's ear.

New England PATRIOTS

2016 record: 14-2
2016 rankings: 4th (yards), 3rd (points)
Key offensive coaches: Bill Belichick (HC), Josh McDaniels (OC)

This ever-evolving, but always productive offense gets a new dimension this year with the trade for speedy WR Brandin Cooks. With Cooks and a healthy TE Rob Gronkowski, the Patriots could lean more toward the passing game. Belichick, McDaniels and QB Tom Brady have been together for so long, and are so deep into the playbook, they always seem a step or two ahead of opposing defenses.

New York JETS

2016 record: 5-11
2016 rankings: 26th (yards), 30th (points)
Key offensive coaches: John Morton (OC), Jeremy Bates (QB)

Among five new offensive coaches on Todd Bowles' staff, Morton and Bates are in a tough spot. Bowles is on the hot seat, and this isn't a talent-rich roster at the skill positions. Morton has roots in the West Coast scheme, and has worked with some bright lights (Jon Gruden, Pete Carroll, Sean Payton, Jim Harbaugh). This is his first shot as an NFL coordinator; most of his background is coaching wide receivers.

AFC NORTH

Baltimore RAVENS

2016 record: 8-8
2016 rankings: 17th (yards), 21st (points)
Key offensive coaches: Marty Mornhinweg (OC/QB)

Marc Trestman's pass-happy ways got the best of him in 2016, with head coach John Harbaugh firing him one-third of the way through the season. Mornhinweg, a seasoned coordinator and former NFL head coach, now has both the QB coach and OC titles. He's an aggressive play-caller, but after a season in which the Ravens set a franchise record for fewest rushing attempts, some semblance of balance is sorely needed.

Cincinnati BENGALS

2016 record: 6-9-1
2016 rankings: 13th (yards), 24th (points)
Key offensive coaches: Ken Zampese (OC), Bill Lazor (QB)

Zampese waited a long time for his first OC job, but free-agent departures and then injuries made for a rough 2016 as the Bengals plummeted to 24th from seventh in points scored. Zampese, who once worked for Mike Martz on the "Greatest Show on Turf" teams in St. Louis, uses a blend of West Coast and "Air Coryell" systems. The addition of Joe Mixon and John Ross should make him look like a better play-caller.

Cleveland BROWNS

2016 record: 1-15
2016 rankings: 30th (yards), 31st (points)

Key offensive coaches: Hue Jackson (HC), David Lee (QB)

Once again, Jackson doesn't have an offensive coordinator, and this year he doesn't even have associate head coach Pep Hamilton, who left to take a college job with Jim Harbaugh at Michigan. At its best, Jackson's first Browns team combined run-pass balance with big-play ability. But those moments were few and far between on a talent-starved offense that has stifled his creativity and flexibility as an offensive mind.

Pittsburgh STEELERS

2016 record: 11-5
2016 rankings: 7th (yards), T-10th (points)
Key offensive coaches: Mike Tomlin (HC), Todd Haley (OC)

Few offenses can boast of the continuity that comes with a 10th-year head coach (Mike Tomlin) and a sixth-year coordinator. It's obviously working, because the Tomlin-Haley combination has produced three straight top-10 finishes in scoring and four top-10 rankings in total offense in the past five seasons. Sure it helps to have playmakers, but the duo is aggressive while paying more than lip service to the running game.

AFC SOUTH

Houston TEXANS

2016 record: 9-7
2016 rankings: 29th (yards), T-28th (points)
Key offensive coaches: Bill O'Brien (HC), Sean Ryan (QB)

The Texans parted ways with offensive coordinator George Godsey at the end of last season, which wasn't a surprise since O'Brien basically took control of play-calling duties in Week 4. O'Brien will call plays this season and doesn't have an OC on staff, so there's a lot on his plate. But the overriding issue here isn't the complex system O'Brien brought with him from New England, his previous stop, it's getting decent play from the QB position.

Indianapolis COLTS

2016 record: 8-8
2016 rankings: 10th (yards), 8th (points)
Key offensive coaches: Rob Chudzinski (OC), Brian Schottenheimer (QB)

Under Chudzinski, the Colts take more downfield shots than most teams, and occasionally stray too much from the run. But despite another middling season overall, and shoulder issues for QB Andrew Luck, this remains one of the league's most productive offenses. That shouldn't change this season, even though most of the team's offseason moves involved shoring up the defense under new GM Chris Ballard.

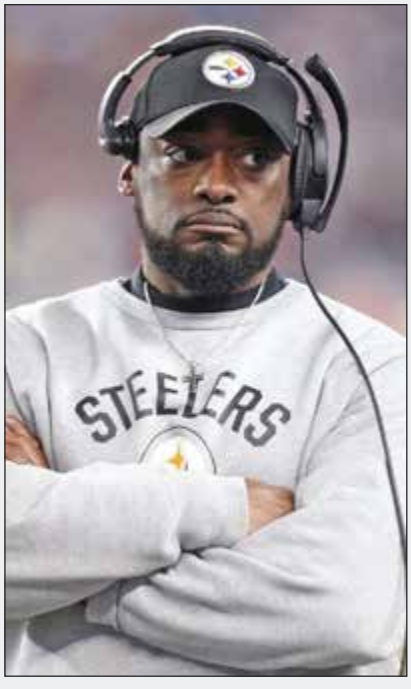
Jacksonville JAGUARS

2016 record: 3-13
2016 rankings: 23rd (yards), 25th (points)
Key offensive coaches: Doug Marrone (HC), Nathaniel Hackett (OC)

With the hiring of Tom Coughlin as executive VP of football operations and the selection of running back Leonard Fournette at No. 4 overall, it's not difficult to see where this is headed. With what figures to be strong defense, look for the Jaguars to go more conventional and more conservative on offense — at least while they try to make strides towards respectability and try to salvage Blake Bortles at quarterback.

Tennessee TITANS

2016 record: 9-7
2016 rankings: 11th (yards), 14th (points)
Key offensive coaches: Mike Mularkey (HC), Terry Robiskie (OC)



The Steelers consistently rank among the NFL's top offenses on Mike Tomlin's watch.

Mularkey's "exotic smash-mouth" approach worked well last season as the Titans were one of the league's most improved offenses. Just when defenses got used to seeing DeMarco Murray and Derrick Henry pound away on the ground, QB Marcus Mariota fired a laser downfield off play-action or on a rollout. The addition of WR Corey Davis and maybe a dash of Adoree' Jackson could add more "exotic" to the "smash-mouth."

AFC WEST

Denver BRONCOS

2016 record: 9-7
2016 rankings: 27th (yards), 22nd (points)
Key offensive coaches: Mike McCoy (OC), Bill Musgrave (QB)

New head coach Vance Joseph has a defensive background, but he has assembled plenty of offensive experience in McCoy and Musgrave. McCoy, the former San Diego head coach, was Broncos coordinator from 2009-12; Musgrave was OC last year in Oakland. Look for more of a power-running approach and a flexible scheme week-to-week that is tailored to team strengths and opponent weaknesses.

Kansas City CHIEFS

2016 record: 12-4
2016 rankings: 20th (yards), 13th (points)
Key offensive coaches: Andy Reid (HC), Matt Nagy (OC)

By Reid standards, the Chiefs' approach has become bolder with more big-play capability because of the considerable talents of Tyreek Hill at wide receiver and out of the backfield as a runner. The expectation is that Hill gets involved in more of the route tree as a pass-catcher this season. TE Travis Kelce can get deep on seam routes and excels after the catch. A healthy WR Jeremy Maclin could push this offense towards elite status.

Los Angeles CHARGERS

2016 record: 5-11
2016 rankings: 14th (yards), 9th (points)
Key offensive coaches: Anthony Lynn (HC), Ken Whisenhunt (OC)

Despite a new head coach, Whisenhunt is among only eight AFC offensive coordinators who return in 2017. That's a 50 percent turnover rate. Despite a torrent of injuries last season and a career-high 21 interceptions for QB Philip Rivers, the Chargers were among the league's more potent offenses. With the addition of draft pick WR Mike Williams and a healthy WR Keenan Allen (fingers crossed), Whisenhunt won't be going conservative.

Oakland RAIDERS

2016 record: 12-4
2016 rankings: 6th (yards), 7th (points)
Key offensive coaches: Todd Downing (OC), Jake Peetz (QB)

Under Bill Musgrave, the Raiders had perhaps the league's most improved offense last season. Nonetheless, head coach Jack Del Rio decided not to retain Musgrave once his contract expired. He's casting his lot with the up-and-coming Downing as coordinator. Downing had a tight relationship with Derek Carr as QB coach, and it's believed Carr will have more freedom running the offense under Downing.

NFC EAST

Dallas COWBOYS

2016 record: 13-3
2016 rankings: 5th (yards), 5th (points)
Key offensive coaches: Jason Garrett (HC), Scott Linehan (OC)

There can be no doubt this is QB Dak Prescott's team. Tony Romo has left the building. The backbone of the offense remains the backfield stylings of Ezekiel Elliott. TE Jason Witten has enough tread left on the tires to remain a reliable security blanket, with WR Dez Bryant the big-play threat. Linehan should open up more of the playbook to Prescott in Year 2, and that should make the Cowboys even more dangerous.

New York GIANTS

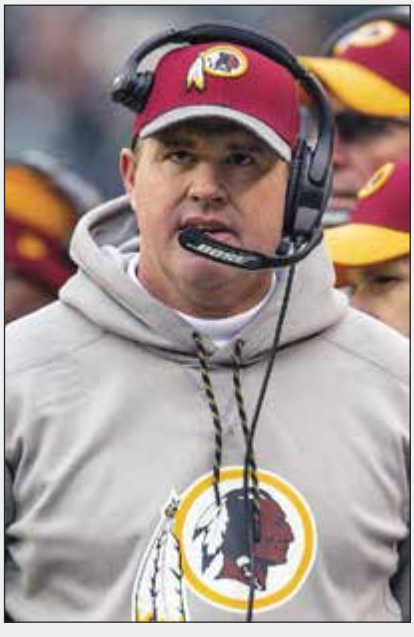
2016 record: 11-5
2016 rankings: 25th (yards), 26th (points)
Key offensive coaches: Bob McAdoo (HC), Mike Sullivan (OC)

The Giants rebounded to make the playoffs last season based on one of the league's most improved defenses. If the offense picks up the pace with the addition of WR Brandon Marshall and rookie TE Evan Engram, the Giants could topple Dallas in the NFC East. They haven't featured the tight end much in McAdoo's rhythm passing scheme; Engram could change that based on how quickly he gains Eli Manning's trust.

Philadelphia EAGLES

2016 record: 7-9
2016 rankings: 22nd (yards), 16th (points)
Key offensive coaches: Doug Pederson (HC), Frank Reich (OC)

Despite all the hype for QB Carson Wentz a year ago, he really didn't play all that well over the last two-thirds of the season. Pederson's West Coast scheme kept it simple, with lots of first-read, high-percentage, safe throws. Wentz must step up his game and digest more of the playbook to make it work. A healthy Alshon Jeffery and a revived Torrey Smith — the new wide-outs — would go a long way toward making that happen.



Washington REDSKINS

2016 record: 8-7-1
2016 rankings: 3rd (yards), 12th (points)
Key offensive coaches: Jay Gruden (HC), Matt Cavanaugh (OC)

With the departure of Sean McVay to take the Rams' head coach job, Cavanaugh got promoted from QB coach to coordinator. Minus McVay, Gruden is expected to take over play-calling once again — at least in the short term. It is a move for continuity in a scheme that may rely more on power running and TE Jordan Reed after losing 1,000-yard WRs DeSean Jackson and Pierre Garcon over the offseason.

NFC NORTH

Chicago BEARS

2016 record: 3-13
2016 rankings: 15th (yards), 28th (points)
Key offensive coaches: Dowell Loggains (OC)

The Bears are almost starting from scratch on offense, particularly in the quarterback room where Mike Glennon, Mark Sanchez, and No. 2 overall pick Mitchell Trubisky are all new. So it's not as much about scheme this year as it is figuring out what Glennon (and eventually Trubisky) can handle, and what they do best. Loggains may dummy it down at first, and hope RB Jordan Howard can build off his great rookie year.

Detroit LIONS

2016 record: 9-7
2016 rankings: 21st (yards), 20th (points)
Key offensive coaches: Jim Caldwell (HC), Jim Bob Cooter (OC)

There was life after Megatron after all. But in the first season following Calvin Johnson's retirement, it seemed like the Lions did it with mirrors, thanks to one QB Matthew Stafford comeback after another. Then again, maybe Cooter, 33, is one of the game's rising stars in terms of Xs and Os. He continues to get the best out of Stafford, with an efficient approach characterized by high completion rate and few interceptions.

Redskins head coach Jay Gruden will call his team's plays, probably favoring power running and targeting the tight end.

Green Bay PACKERS

2016 record: 10-6
2016 rankings: 8th (yards), 4th (points)
Key offensive coaches: Mike McCarthy (HC), Edgar Bennett (OC)

In a carryover from 2015, the offense and Aaron Rodgers looked a little stale at the start of last season. But that quickly changed, Rodgers posted one of his best seasons ever, and the Packers reached the NFC title game. Draft picks Jamaal Williams and Aaron Jones should freshen up the running game. Leave the rest to Rodgers, who can pick apart a blitz with rhythm passing, launch the deep strike, or improvise with his legs.

Minnesota VIKINGS

2016 record: 8-8
2016 rankings: 28th (yards), 23rd (points)
Key offensive coaches: Pat Shurmur (OC)

Shurmur was there in the beginning with Sam Bradford, when Bradford was NFL offensive rookie of the year for the St. Louis Rams. Shurmur gets another full season with Bradford after stepping in for Norv Turner at midseason in 2016. Shurmur likes high-percentage passes and doesn't take many chances. That suits Bradford's style. Better line play and an actual running game with Latavius Murray and Dalvin Cook will help.

NFC SOUTH

Atlanta FALCONS

2016 record: 11-5
2016 rankings: 2nd (yards), 1st (points)
Key offensive coaches: Steve Sarkisian (OC), Bush Hamdan (QB)

Forget about Super Bowl hangover. Kyle Shanahan and QB Matt Ryan made beautiful music together, and now Shanahan is the head coach in San Francisco. Adding to the brain drain, last year's QB coach — Matt LaFleur — joined Sean McVay in Los Angeles as Rams offensive coordinator. En route to the Super Bowl, Atlanta lived off a zone-blocking run scheme that fed into lots of play-action. Will Sarkisian do the same?

Carolina PANTHERS

2016 record: 6-10
2016 rankings: 19th (yards), 15th (points)
Key offensive coaches: Mike Shula (OC)

Across the NFL, one of the most fascinating aspects of the entire 2017 season will be how Shula integrates rookies Christian McCaffrey and Curtis Samuel into the scheme. Are they running backs? Wide receivers? Will he line them both up in the backfield, then do crazy things with motion? As Cam Newton, 28, creeps closer to middle age as a NFL quarterback, he may be used less as a running option in the offense.

New Orleans SAINTS

2016 record: 7-9
2016 rankings: 1st (yards), 2nd (points)
Key offensive coaches: Sean Payton (HC), Pete Carmichael (OC)

QB Drew Brees combines great vision with uncanny accuracy. Payton may be the best in the game at fine-tuning the playbook to maximize strengths and avoid weaknesses in his skill players. A byproduct of that is heavy use of personnel groupings. Brees and Payton get everyone involved. The supporting cast changes, but the offense remains dynamic as ever year after year. Which is a long way of saying WR Brandin Cooks won't be missed.

Tampa Bay BUCCANEERS

2016 record: 9-7
2016 rankings: 18th (yards), T-18th (points)
Key offensive coaches: Dirk Koetter (HC), Todd Monken (OC)

A rarity in today's game, Koetter isn't afraid to take chances or throw deep. This isn't a quick-passing scheme. The Bucs go downfield more than most teams in the league, and QB Jameis Winston likes it that way. The approach certainly won't change with the addition of veteran WR speedster DeSean Jackson and rookie TE O.J. Howard. More is needed from the running game, but the arrow is pointing up for this offense.

NFC WEST

Arizona CARDINALS

2016 record: 7-8-1
2016 rankings: 9th (yards), 6th (points)
Key offensive coaches: Bruce Arians (HC), Tom Moore (Asst. HC)

It sure looks like the window is closing on an Arizona team that still put up good numbers a year ago, but wasn't nearly as explosive. With QB Carson Palmer and WR Larry Fitzgerald nearing the end of their careers, this offense has become more RB David Johnson-centric. That's certainly not a bad thing, but the Cardinals have become a little methodical in approach and a little more predictable to defend.

Los Angeles RAMS

2016 record: 4-12
2016 rankings: 32nd (yards), 32nd (points)
Key offensive coaches: Sean McVay (HC), Matt LaFleur (OC)

The Rams couldn't get Jon Gruden out of the booth to replace Jeff Fisher, but they did get a Gruden protege' in McVay, at 31 the youngest head coach in modern NFL history. He was in high school the last time the Rams had a winning record. So yes, the task is daunting for a team that was dead last in total offense the past two seasons. Job 1 is getting QB Jared Goff, who looked overwhelmed as a rookie, on solid footing.

San Francisco 49ERS

2016 record: 2-14
2016 rankings: 31st (yards), 27th (points)
Key offensive coaches: Kyle Shanahan (HC/OC), Rich Scangarello (QB)

Yes, Shanahan has the dual title of head coach/offensive coordinator. No doubt who's running the show here, right? Based on what he helped accomplish last season as OC in Atlanta, Shanahan looks like the pick of the litter among the new head coaches. But he's got Brian Hoyer at quarterback, not Matt Ryan. And he's turned the 49ers' roster inside-out. Before Shanahan can work his playbook magic, he must make sure everyone gets lined up right.

Seattle SEAHAWKS

2016 record: 10-5-1
2016 rankings: 12th (yards), 18th (points)
Key offensive coaches: Pete Carroll (HC), Darrell Bevell (OC)

Since Marshawn Lynch's last 1,000-yard rushing season in 2014, the Seahawks have become much more dependent on the pass. QB Russell Wilson, banged up for most of 2016, rushed for only 259 yards — a career-low by 230 yards. All signs point to the Seahawks continuing to stray from their physical power running game of the Carroll glory years. Unless, of course, Eddie Lacy can stay healthy and stay (relatively) trim.

Antonio Brown's ranking as the No. 1 receiver in fantasy football is well deserved. He catches at least 100 passes a year, and gets high marks for durability and competitiveness.

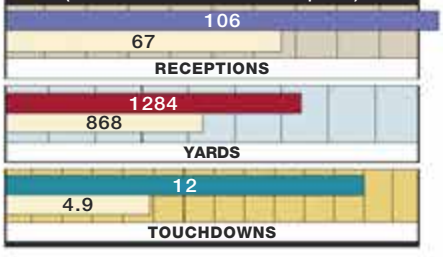
COMPARISON WITH 2016 LEAGUE AVERAGE
(WRs with a minimum of 40 receptions)



STATISTICAL CONSIDERATIONS: In 2016, Brown became just the second receiver to grab 100 or more passes in four consecutive seasons — Marvin Harrison also belongs to that club. Brown had his lowest YPC in four years and lost 39 targets (and one start) from the previous season, but 13 overall touchdowns were a great deodorant. The Steelers aren't worried about his aging curve — they signed him to a four-year, $68 million extension in February.

FANTASY SPIN: Some fantasy pundits might move Brown off the top spot as a comment against Ben Roethlisberger, who's dealt with injury issues and jagged home/road splits in recent years. But Brown has a playing style that should translate through his late 20s and early 30s, and he's always received high marks for his durability, worth ethic and competitiveness. Brown has been a profit player for six straight years; we don't expect that trend to change in his age-29 season.

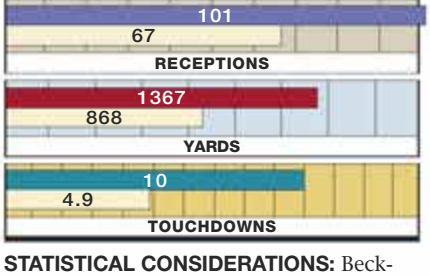
COMPARISON WITH 2016 LEAGUE AVERAGE
(WRs with a minimum of 40 receptions)



STATISTICAL CONSIDERATIONS: Beckham has finished WR5, WR5 and WR4 in his brief career, and that's come despite five missed games and the inconsistent play of Eli Manning. Beckham lost 1.6 yards from his YPC last year and his catch rate dropped slightly, but again, we're trained to pin that on quarterback, not receiver. Beckham was targeted 21 times in the red zone — fourth-most in the league — but just nine of them were completed.

FANTASY SPIN: Beckham is going to be something of a variance player, but his peaks are so glorious, we'll take the overwhelming good with the occasional stinker. The addition of Brandon Marshall is one of those chicken-egg things for fantasy — does it help Beckham by diverting defensive attention, or will it hurt Beckham by cutting into his opportunity? At the end of the day, this is a generational talent who's been crazy-productive for three straight years. You'll need a lottery pick to select him, and we'd be surprised if OBJ's play didn't validate that selection.

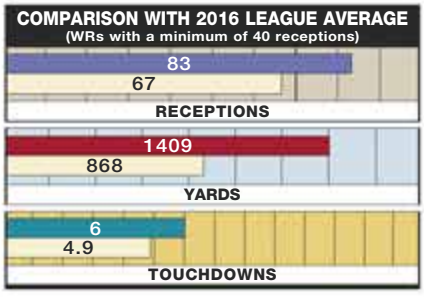
COMPARISON WITH 2016 LEAGUE AVERAGE
(WRs with a minimum of 40 receptions)



STATISTICAL CONSIDERATIONS: For all of Jones' obvious plusses — he's made four Pro Bowls; he's been All-Pro twice; he's won a catch title and yardage title; he was a highlight film in the Super Bowl — we always return to the stuff he doesn't do. He's played just two full seasons out of six, and he's scored 40 times in 79 games (a good ratio for most, but underwhelming for an elite receiver). It's been especially puzzling over the last four years, when Jones has an ordinary 22 touchdown catches. Last year, the Falcons had the most widely distributed passing offense in history, with a league-record 13 players catching a touchdown pass (and no one hauling in more than six). Jones had foot surgery in March, but should be fine for camp.

SCOUTING PROFILE

FANTASY SPIN: It's not like we're slapping Jones in the face with this ranking — No. 3 at a position loaded with stars — but we won't be targeting him in the first round, specifically because the Falcons don't go out of their way to target him (Jones had just nine targets in

the red zone last year, and the touchdown count speaks for itself). Watching Julio can also be a little unnerving at times for his owners, given the common sight of Jones hobbling to and fro. He deserves full credit for his toughness and competitiveness, but we're not comfortable projecting a full season here.

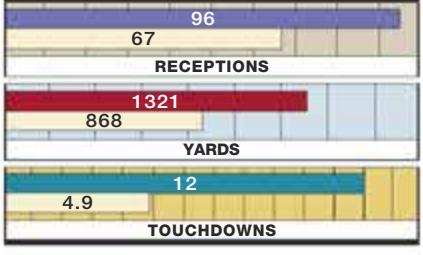
COMPARISON WITH 2016 LEAGUE AVERAGE
(WRs with a minimum of 40 receptions)



STATISTICAL CONSIDERATIONS: Evans has never managed a catch rate higher than 55 percent, but at his volume levels, it's hard to quibble. He led the NFL in targets last year, and he's already generated a pair of 12-touchdown seasons in three years. With little fanfare attached, he was the No. 1 receiver in basic-scoring formats last year.

SCOUTING PROFILE

FANTASY SPIN: Evans could be looking at a sizable target giveback this year, with DeSean Jackson and rookie tight end O.J. Howard added to the roster. That said, Evans has been a reliable wideout from the moment he went pro, and the timing is right for Jameis Winston to take a step forward. Evans belongs in the first round of any draft; we won't quibble if you take him before Julio Jones.

STATISTICAL CONSIDERATIONS: Green was quietly having one of his best seasons in 2016 before a hamstring injury cost him the final six games. He led the NFL in yards per game at the time of his injury, and finished with a personal best 66-percent catch rate. Green had only four scores for the year, but had double-digit touchdown counts in three of the previous five seasons.

STATISTICAL CONSIDERATIONS: Nelson is generally regarded as one of the league's best deep threats, but he was the runaway leader in red-zone targets, catches and touchdowns last year (29, 19, and 11, respectively). That's what a mind-meld between Aaron Rodgers and Nelson will do for you, especially on the unstoppable back-shoulder throw. Nelson has been fantasy's No. 2 receiver in three of his past five full seasons.

FANTASY SPIN: Nelson turned 32 in May and the Packers have other talented receivers, so it's a tricky time to appraise his value. He's coming off his lowest YPC since 2010, though that's largely mitigated by the work he did around the goal line. Is age just a number when you rank your wide receivers, or would you rather be a year or two early on someone like Nelson? Someone figures to take the plunge at the end of the first round. We're not sure what's scarier: picking Nelson then, or allowing your rival to select him.

But given his extreme efficiency — and the efficiency of Russell Wilson — this is someone who can do a lot with a modest amount of opportunity. Baldwin has always played with a chip on his shoulder and a tremendous amount of competitiveness, and he's one of the best route-running technicians in the league. There's no way we're betting against him after the past two years. You can consider him in the second round; it would be highway robbery if he slides to the third.

STATISTICAL CONSIDERATIONS: The red zone has been a dead zone for Cooper over two NFL seasons. He still doesn't have a catch inside the 10-yard line as a pro, not counting a pair of grabs on two-point conversions. He finished with 13 targets inside the 20 last year, good for five piddly catches, 42 yards and no scores. We're comfortable projecting Cooper with a similar ranking to where he finished last year, with the idea that he could take another step forward if he starts scoring in close — or gets a little luckier on the long touchdowns. We love the talent, the work ethic, and the overall physical package here.

FANTASY SPIN: The Patriots added Cooks, but didn't subtract any major pass-catching options, which could present a fantasy conundrum. New England's favorite receiver is often the player with the ideal matchup; this isn't an offense that goes out of its way to feature a specific player. Nonetheless, the Patriots paid up to get Cooks (surrendering a first-round pick) and catching passes from Tom Brady is generally a good gig. STATISTICAL CONSIDERATIONS: The Raiders didn't draw a lot of attention when they added Crabtree before the 2015 season, but he's quietly been the WR20 and WR11 since joining the club. Crabtree's boundary work is a big reason why, and it's helped him grab 17 touchdowns in the silver and black. STATISTICAL CONSIDERATIONS: Edelman had 119 receptions in 2016 if you include the playoffs, but the only one people remember is the all-time highlight near the end of the Super Bowl. He didn't have a touchdown during the opening month of Brady-less play, but his line spiked to 79-910-3 in the final three months (a disappointing touchdown count, but good enough to make him the No. 9 receiver in PPR over that period).

FANTASY SPIN: As usual, the Patriots have a crowded receiving corps and an offense that won't force the ball to anyone in particular. Edelman deserves a bump of 5-10 spots if you play in a full PPR format, but given that he's scored just 20 touchdowns since emerging four years ago, we have to be measured with his standard ranking. He's entering his age-31 season, and he's been a heavy-collision player for most of his career.

STATISTICAL CONSIDERATIONS: A run of soft-tissue injuries and a suspension have ruined Jeffery's production the past two seasons; he's played in just 21 of a possible 32 starts. And of the 49 receivers who had 94 or more targets in 2016, Jeffery is the only one who scored just two touchdowns.

FANTASY SPIN: Jeffery took a prove-it deal when he moved to the Eagles — a one-year contract, essentially a free-agent season. But how much of his upside will blossom given a new offense, a young quarterback and a growing injury file? We're agnostic at the draft table; there are no bad players, just bad prices. That said, there's an outstanding chance we won't have any Jeffery shares this year. Let someone else dream of his salad days.

The Lions occasionally gave Tate a shot at a running play last year, but they didn't go anywhere — 10 rushes, 4 yards. He also had 17 red-zone targets, but just one red-zone touchdown, the worst ratio among the 38 busiest offensive players.

STATISTICAL CONSIDERATIONS: If you want a field stretcher, put Jackson on speed-dial — he's averaged 17.7 yards per grab over his nine-year career, leading the league in YPC three different times (including 2014 and 2016). But long touchdowns don't show up that often — Jackson scored a modest 14 times in his three Washington seasons — and he's played just two full seasons since turning pro. FANTASY SPIN: Wide receiver is a boom-or-bust position to begin with, but Jackson probably has more volatility to his game than the average guy. He's a fun pick in best-ball formats, where you get any high score when it arrives, post-facto. It's much harder to figure Jackson for seasonal and DFS purposes, when you have to predict his big plays before they actually happen. Give him about 60-65 catches, more than 1,000 yards, and a handful of big plays. Ideally, you'd like to have two or three receivers on your roster who are considerably more consistent than Jackson is.

To make things more complicated, Tyrell Williams had a breakout season last year — taking advantage of Allen's absence — and second-year tight end Hunter Henry is seen by many as a rising star. We can never be sure if Allen will be healthy to begin with, and even if he is, there's a crowded group of competitors. If you like your scores from distance, feast your eyes on the length of those TDs: 3, 3, 9, 10, 34, 36, 38, 68, 70, 78, 86 and 95 yards. The longest three came on kick returns, something you have to be careful with — no matter how dynamic a returner is, those game-breaking runbacks don't happen often. FANTASY SPIN: Matthews caught 12 of his 15 red-zone targets and turned seven of them into touchdowns — all outstanding rates. Normally we'd be looking at this type of player and instantly forecast a major expansion of his role, but the Titans spent the No. 5 overall draft pick on wide receiver Corey Davis. We suspect Davis will be overrated in his first season and Matthews a touch underrated, but the Titans want balance and won't force a slew of targets to anyone. It is possible Matthews just had his best fantasy season, though he seems capable of a more significant share of the offense.

STATISTICAL CONSIDERATIONS: Parker traded catch rate for yardage in his second season, though the 5.7 giveback in YPC was probably more than you'd want for the 12.4 percent improvement in his catch rate. He's started 12 games since turning pro, and while the "start" count isn't always reflective of how regular someone's playing time is, Parker topped 10 targets in only two games last year.

FANTASY SPIN: Year 3 is still the magic time for a lot of young receivers, and in early summer the Dolphins were flooding the Internet with all sorts of pro-Parker propaganda. Sometimes that coach-speak has meaning, and often times it doesn't — but we've always liked Parker's raw ability, his college tape and his pedigree. He'll be one of our first scouting assignments in August. The Dolphins are desperately looking for a big, physical receiver they can rely on at the goal line — and Parker has big-play ability to boot.

STATISTICAL CONSIDERATIONS: So much of life is just showing up, but we should acknowledge that Garcon has shown up, and then some, over the past few seasons. He's seventh in cumulative WR receptions over the last four years, and ranks 23rd in cumulative WR fantasy points. Garcon's best year (113-1,346-5) came when Kyle Shanahan was his offensive coordinator; now the duo is reunited in San Francisco.

FANTASY SPIN: Garcon is entering his age-31 season and the Niners offense isn't anything close to what he had in Washington, so we have to temper expectations, sure. But you can probably get Garcon at a WR4 or WR5 cost in many leagues, and he could easily blow that out of the water simply by becoming San Francisco's most trusted target. Sometimes the boring veteran pick is the right pick.

STATISTICAL CONSIDERATIONS: Cobb has just two full seasons out of six; last year, ankle and hamstring injuries held him back. Cobb's touchdown-to-catch ratio was his worst in five seasons, and he had the puniest YPC of his career. The Packers might as well junk the occasional running play they design for Cobb; the last 34 of them have netted a paltry 120 yards.

STATISTICAL CONSIDERATIONS: The Chargers were holding their breath when Keenan Allen was lost in the 2016 season opener, but Williams was ready for his close-up during a dynamic second season. A 15.3 YPC is snappy work for a young player, and he spread his seven touchdowns into seven different games. Williams's didn't have a decline in the second half of the year — in fact, his TD rate went up — so it's not like teams figured him out as the season went along.

FANTASY SPIN: Williams would be higher on the list had the Chargers not drafted play-making Mike Williams in the first round in April. It's not that the younger Williams will necessarily have a meaty role from Day 1, but it's another mouth to feed in a very crowded Chargers passing game. Allen could come back and complicate things, tight end Hunter Henry is a player on the rise, and Antonio Gates apparently is going to play until he's 60. With only one football to go around, it could get frustrating for fantasy owners.

STATISTICAL CONSIDERATIONS: Brown has played a very misleading 46 of 48 games as a pro, many of them at compromised speeds. Shoulder and ankle problems have crept into the mix, along with a nagging sickle-cell issue, which partially explain his 2.1-yard drop in YPC last year and five vanishing touchdowns. STATISTICAL CONSIDERATIONS: It took the Bears a while to stumble into their best skill players last year; note how Jordan Howard was buried to start the season. The same could be said of Meredith, an undrafted wideout who hardly played during 2015, his rookie year. Meredith's breakout came in Week 5, a 9-130-1 clinic at Indianapolis, and even with some bumps along the way, he was a top-20 fantasy receiver over the final three months.

But here's the catch: The Chiefs found passing success in the absence of Maclin, with Tyreek Hill going off in his rookie season and Travis Kelce having a career year. This used to be Maclin's passing offense, for as much as you could get juice out of a team led by Alex Smith. Now, Maclin might have to fight for a featured spot. And keep in mind, he's played just two full seasons since turning pro in 2009.

STATISTICAL CONSIDERATIONS: The receiver class of 2014 probably screwed up everyone's expectations for first-year wideouts; most seasons, we have to keep realistic projections in mind. Shepard wasn't a deep threat in his first slot-manning season, but a 62-percent catch rate is solid, especially when you factor in how inconsistent Eli Manning was last year. What They're Saying About the

2017 ROOKIE WIDE RECEIVERS

COREY DAVIS

TEAM: Tennessee
HT: 6-3 WT: 209 40 SPEED: 4.48
COLLEGE: Western Michigan DRAFT: 1 (5)

"I don't know how fast Davis can run, but Michael Irvin ran 4.57, and Davis makes plays like Michael Irvin did," said one scout. "Watch tape of their games against Illinois, Northwestern, Wisconsin, and you see that he could have been a star for any team in the country. He's strong, quick and can break tackles."

"He's a niftier athlete than Mike Williams is, bends a little easier," said another scout. "He's good, but not like some of the top guys from the past two years. He's like Jordan Matthews from the Eagles, but with better hands."

MIKE WILLIAMS

TEAM: Los Angeles Chargers
HT: 6-4 WT: 220 40 SPEED: 4.52
COLLEGE: Clemson DRAFT: 1 (7)

"Power guy all the way," said one scout. "Really good ball skills, but he doesn't have the great speed. He can't separate sufficiently. He makes a lot of contested catches, and he's going to have to prove he can do that at the next level."

"He refused to do a short shuttle and a 3-cone at the Combine and at their Pro Day," said another scout. "Why? Probably because he's not that quick in and out of breaks. But when the ball is in the air, he'll go and get it. He's big and he's tough. He's kind of like Laquon Treadwell last year."

JOHN ROSS

TEAM: Cincinnati
HT: 5-11 WT: 188 40 SPEED: 4.22
COLLEGE: Washington DRAFT: 1 (9)

"He's from the DeSean Jackson mold," said one scout. "He's a burner, but he's also skilled. He is extremely explosive, and he's got very good body control through the route."

"If you want the speed element, a playmaker, he's the guy," said another scout. "But those small wideouts have a hard time surviving long-term. The speed is wonderful, but he's had some injuries. Is he fragile, or will he be on the field enough to make a difference?"

ZAY JONES

TEAM: Buffalo
HT: 6-2 WT: 201 40 SPEED: 4.45
COLLEGE: East Carolina DRAFT: 2 (37)

"His ball skills are among the top three in this crop," said one scout. "He's physical. He has to go into a crowd sometimes because he lacks really good separation and he's not a run-after-the-catch guy. He's a possession type. I'd rather have him as my third guy than as a starter."

MIKE WILLIAMS

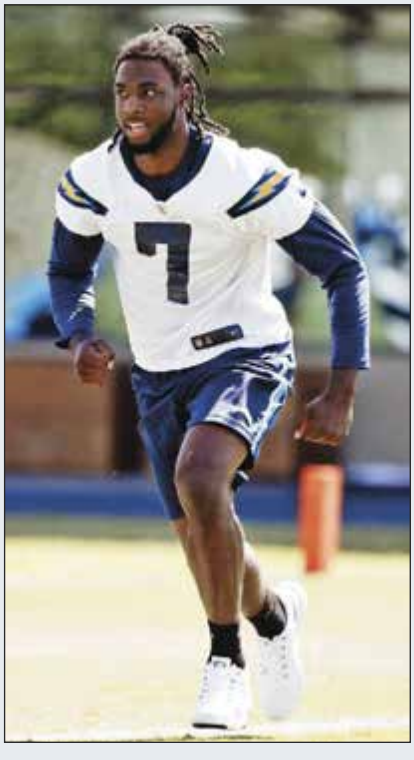

PHOTO BY AP PHOTO/GREGORY BULL

"He is a good route runner, but I don't see any acceleration," said another scout. "I see him as an Anquan Boldin type, and there's nothing wrong with that. They kept throwing to him and throwing to him in college, and he produced big."

CURTIS SAMUEL

TEAM: Carolina
HT: 5-11 WT: 195 40 SPEED: 4.31
COLLEGE: Ohio State DRAFT: 2 (40)

"Sometimes you end up with guys that are just quick and sometimes you end up with guys that are just fast, and sometimes you get both. He's both," said one scout. "He's still learning how to run routes. In terms of catch radius and all that from the elite guys, he's not up to that level. But once he gets the ball, he's as elite as they come."

"He's not really natural as a receiver and he's not natural as a running back," said another scout. "He's supposed to be a big-play speed guy, but he doesn't make any big plays. He's just more of an athlete than a player right now."

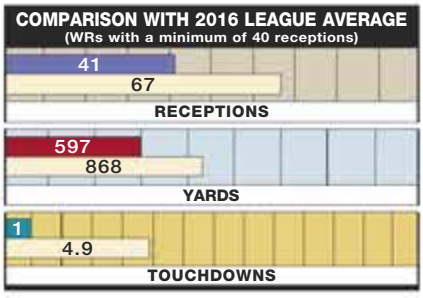
JUJU SMITH-SCHUSTER

TEAM: PITTSBURGH
HT: 6-1 WT: 215 40 SPEED: 4.54
COLLEGE: Southern California DRAFT: 2 (62)

"He's got a little Steve Smith in him in how he attacks the game," said one scout. "He's got good enough hands, body control and quickness, and OK speed for his size. I thought he played a little heavy last year. He was up to about 225 pounds. You have to go back and watch 2015 film to get a good feel for him. His game is all about strength and power."

"As a freshman and sophomore, he looked like he was a top guy," said another scout. "I think he's gotten too big and lost some of his quickness. But he is really strong and shows some talents."

Scouts' quotes were gathered prior to the NFL Draft.
40 speeds are from the NFL Combine, when available.



STATISTICAL CONSIDERATIONS: Lockett's rookie year in 2015 got people excited; he scored eight touchdowns (including returns) covering 324 total yards. But those long scores are a dangerous thing to count on, and Lockett found only two of them in 2016, a 57-yard reception and a 75-yard run. External factors, including Russell Wilson's injuries and a patchwork offensive line, removed him from the game plan more than the Seahawks would have liked. Lockett has never seen more than eight targets in an NFL game.

FANTASY SPIN: Fantasy players went looking for stats in all the wrong places with Lockett last year. Now we know better. There's juicy potential in his big plays, but he's unlikely to be a heavy volume player. Think of him as a fun gadget play for best-ball and no-maintenance leagues; it's hard to trust Lockett in standard formats. At least if he runs back a kick or two, Seattle DST owners will be happy about it.

STATISTICAL CONSIDERATIONS: Anderson had some moments in the garbage-time period of New York's 2016 season, including a three-game run of 14-240-2 in December. He had a couple of interesting news items in the offseason, too: He spent time working with former NFL star Chad Johnson shortly after the season, and was arrested in Miami for resisting arrest in May.

FANTASY SPIN: Assuming the off-field issues are sorted out, Anderson will probably start the year as the No. 3 receiver on the Jets' depth chart. He struggled with drops and technical details at times as a rookie, but a 42-587-2 haul is a respectable one given how bad the Jets' passing game was last year. Give Anderson an additional summer audit before you settle in on draft day.

STATISTICAL CONSIDERATIONS: White's initial year was an injury wipeout, and he didn't get far in 2016, either. A 52.8 percent catch rate is downright awful for someone who isn't even making 10 yards per catch. It's hard to believe this is the same player who was the No. 7 overall pick in the 2015 draft.

FANTASY SPIN: White will essentially take his third crack at a rookie year in 2017. He turns 25 in June, so it's certainly too early to write him off. The Bears will give him every chance, as they need to figure out if White is worth a second contract. Nothing we've seen to this point suggests he'll make it in the NFL, but maybe the lightbulb will go on in 2017. We'd like to see a flash before we bother with our draft capital.

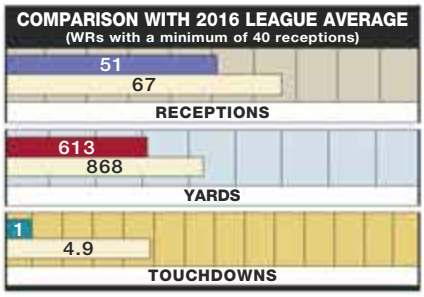
'16	BUF	13	51	76	613	47.2	12.0	34	1



STATISTICAL CONSIDERATIONS: Woods did enough in his four Buffalo seasons to coax a five-year, $39 million deal from the Rams ($15 million guaranteed). A 67-percent catch rate and 12.0 YPC last year is solid enough, though Woods didn't crack the 700-yard barrier in any of his first four seasons. Perhaps the Rams were watching intently when Buffalo and Seattle played a Monday night game in Week 9; Woods had the game of his life that night (10-162-0).

FANTASY SPIN: Someone has to lead the Rams in receiving, and it might as well be Woods, given his contract. If your league is deep enough for an 850-yard receiver to hold value, Woods could make sense as a late-round pick. Just remember how spooked quarterback Jared Goff appeared last season.

58. JOSH DOCTSON

TEAM: Washington HT: 6-2 WT: 206 AGE: 24
COLLEGE: Texas Christian NFL SEASONS: 1

STATISTICS

YR	TM	G	REC	TAR	YDS	Y/G	YPC	LNG	TD
'16	WAS	2	2	6	66	33.0	33.0	57	0

PLAYED IN ONLY TWO GAMES

STATISTICAL CONSIDERATIONS: An Achilles' injury limited Doctson to two games as a rookie, though he was also held back by the depth of the Washington roster. The team got more out of Jamison Crowder than expected, and Pierre Garcon remained productive on the outside — where Doctson was expected to be a factor. Garcon is gone, but Washington added Terrelle Pryor, fresh off his breakout season in Cleveland.

FANTASY SPIN: Doctson was the 22nd overall pick two drafts ago, so someone inside Team HQ would like to see him succeed. But like a lot of recent rookie

receivers, Doctson is basically in start-over mode after doing next to nothing in his first year. We'll be looking for a reason to believe during the summer, but we won't force anything if we don't see anything.

FANTASY GRADE 2.0

59. MARQISE LEE

TEAM: Jacksonville HT: 6-0 WT: 200 AGE: 25
COLLEGE: USC NFL SEASONS: 3

STATISTICS

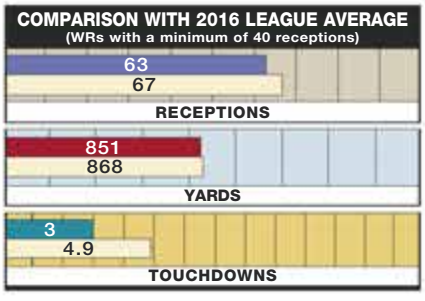
'16	JAC	16	63	105	851	53.2	13.5	51	3



STATISTICAL CONSIDERATIONS: Lee was Jacksonville's best receiver in 2016 and it wasn't particularly close — his 13.5 YPC was an eyelash behind Allen Hurns' number, and Lee's catch rate was considerably higher than Hurns or Allen Robinson. Lee hardly played in his first two seasons, hampered by soft-tissue injuries. Note that Lee was chosen 22 picks ahead of Robinson in 2014 (Hurns was undrafted) after a standout career at USC. On Robinson's side, he's almost two years younger than Lee.

FANTASY SPIN: Lee and Hurns have different body types and skill sets, but Lee probably will enter summer camp as the team's No. 2 priority in the passing game. To be fair, this is a team that's looking to run the ball more and looking to restrain its quarterback, but Lee could be an interesting late-round pick in medium and deeper leagues.

60. KENNY STILLS

TEAM: Miami HT: 6-0 WT: 195 AGE: 25
COLLEGE: Oklahoma NFL SEASONS: 4

STATISTICS

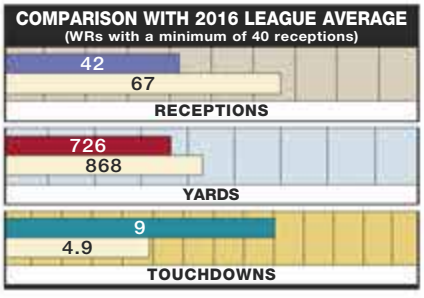
'16	MIA	16	42	81	726	45.4	17.3	74	9



STATISTICAL CONSIDERATIONS: Catching nine or more touchdown passes on fewer than 50 receptions is a pretty nifty trick — only nine players have done it in the past 10 seasons. Stills was one of the primary deep threats to turn the trick; of this nasty nine, he had the second-best YPC and the second-lowest catch rate. His average score went for 40 yards last season.

FANTASY SPIN: Not everyone understood regression theory a decade or two ago, but now fantasy players are fairly hip to some simple concepts. Long touchdowns are wonderful when they occur, but still unlikely events. And players aren't supposed to score a touchdown for every five receptions, no matter how talented they are. Stills has earned the right to keep his role as Miami's No. 3 receiver, but even if he gets a little more opportunity this season, his returns are almost guaranteed to decline. Gravity always wins.

61. J.J. NELSON

TEAM: Arizona HT: 5-10 WT: 160 AGE: 25

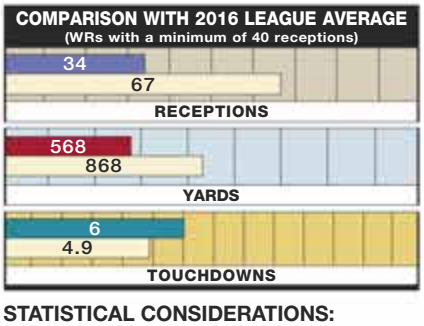
'16	ARI	15	34	74	568	37.9	16.7	80	6



STATISTICAL CONSIDERATIONS: Although the Cardinals have always liked Nelson, they had no choice but to expand his role last year. Michael Floyd played his way off the roster; John Brown had an ongoing issue with his sickle-cell condition; and Jaron Brown blew out a knee. Nelson is a deep threat and a space-clearer, but occasionally the Cards will pepper him with opportunity — he had three double-digit target games last year.

FANTASY SPIN: At 5-10 and 160 pounds, Nelson doesn't have the type of body that generally leads to running a complete route tree. But Bruce Arians and Carson Palmer cooked up some connections for Nelson last year, and we could see a similar finishing stat line for 2017. Like most receivers who concentrate on the distant routes, it will be difficult to project his big games in advance.

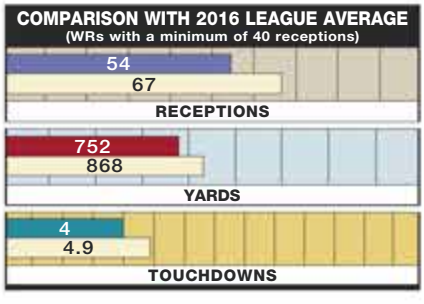
'16	CAR	16	54	95	752	47.0	13.9	88	4



STATISTICAL CONSIDERATIONS: Ginn had one of those charmed-life long-touchdowns seasons in 2015, then dropped back to reality last fall. He didn't have a bad year — he finished with the second-best receiving total and second-best yardage total of his 10-year career. But the YPC drain and the loss of six touchdowns, that's just how this big-play regression stuff works. He also had one score on a rushing play.

FANTASY SPIN: The Saints signed Ginn to a three-year, $11 million contract, feeling that the veteran wideout can still stretch defenses at age 32. Ginn will be more valuable to the Saints as a downfield clear-out guy than he is to fantasy owners this fall. Maybe you'll kick some Ginn tires during bye-week season or when injuries come at your roster, but he won't see enough volume to have projectable consistency.

TIGHT ENDS

1. ROB GRONKOWSKI

TEAM: New England HT: 6-6 WT: 265 AGE: 28
COLLEGE: Arizona NFL SEASONS: 7

STATISTICS

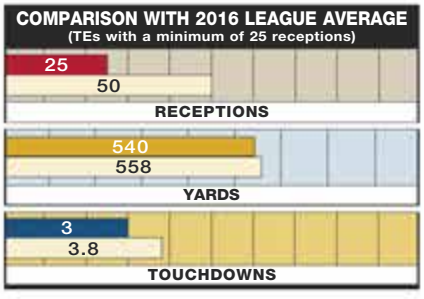
'16	NE	8	25	38	540	67.5	21.6	53	3



STATISTICAL CONSIDERATIONS:
Gronkowski again led his position in per-game fantasy scoring in 2016, but, of course, nobody won a league because of him as he appeared in just eight games before undergoing back surgery in December. Over the past five years, Gronk has missed 24 games. Not good. But when he plays, he remains the NFL's most dangerous tight end, an elite fantasy commodity. He's averaged 69.3 receiving yards per game for his career (67.5 last year) while scoring 69 touchdowns over seven seasons. He topped all tight ends in both yards and fantasy points in 2014 and 2015.

FANTASY SPIN: If we could guarantee Gronkowski would remain healthy and appear in all 16 games, he would be a no-doubt first-round fantasy selection. But his medical history is long, complicated and worrisome enough to bump him from Round-1 consideration, though not from the top of the tight-end ranks. He remains a rare talent tied to an all-time quarterback, playing in one of the league's most explosive offenses. Even with the various new additions to New England's receiving corps, he'll remain the most dangerous chess piece on the board. He's expected to be good to go in Week 1, following his third reported back procedure. If you draft him, you have to hope he'll get this year's injuries out of the way before December, when fantasy owners will need him most.

2. TRAVIS KELCE

TEAM: Kansas City HT: 6-5 WT: 260 AGE: 27
COLLEGE: Cincinnati NFL SEASONS: 4

STATISTICS

YR	TM	G	REC	TAR	YDS	Y/G	YPC	LNG	TD

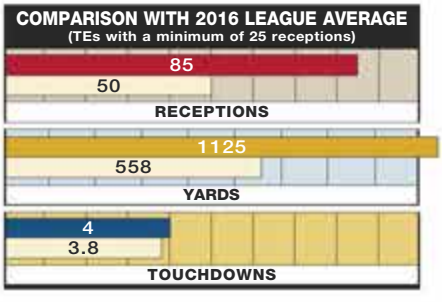
'16	KC	16	85	117	1125	70.3	13.2	80	4



STATISTICAL CONSIDERATIONS:
Kelce delivered on his immense potential last season, leading NFL tight ends in receiving yards (1,125) and total fantasy points (8.5 PPG in standard, 13.8 in PPR). He appeared in all 16 games for the third straight year, which is no small detail. He established career highs in targets (117) and receptions (85), and over the final six weeks of the fantasy season (ignoring Week 17), emerged as the game's most reliable tight end. During that stretch, he reached the 100-yard plateau five times. The one area in which Kelce continues to disappoint is arguably the most important for a fantasy tight end: He found the end zone only four times. When a team's starting quarterback throws 15 TD passes, it's tough for any member of his receiving corps to emerge as a dominant fantasy asset.

SCOUTING PROFILE	
HANDS/BALL ADJUSTMENT	7
SPEED/QUICKNESS	7
LINE RELEASE/ROUTES	7
COVERAGE RECOGNITION	6
CATCH IN TRAFFIC	7
RUN AFTER THE CATCH	7

FANTASY SPIN: Kelce firmly established himself as the central figure in Kansas City's passing game last season, leading the team by wide margins in targets, receptions and receiving yards. He was the only member of the receiving corps to top 600 yards. He underwent shoulder surgery in the offseason, but the issue isn't expected to limit him in training camp. His durability gives him a significant edge over the other tight ends surrounding him in the position ranks. The only flaw in his fantasy game is his modest usage near the goal line. He was targeted only three times on pass attempts inside the 5 last year, which ranked behind such luminaries as Coby Fleener, Clive Walford and Darren Waller. Regardless, he's earned a spot in the highest tier at his position, and no one should be surprised by another 80-catch campaign.

STATISTICAL CONSIDERATIONS:
Despite playing only 12 games, Reed ranked seventh among tight ends in both receptions (66) and touchdowns (6) in 2016, finishing as the No. 2 per-game scorer at his position. His talent as a receiver has never been in doubt. Reed is

one of the more dynamic, exciting tight ends in today's NFL. He's just one season removed from a 952-yard, 11-touchdown campaign. Washington lost a pair of 1,000-yard receivers in free agency, Pierre Garcon and DeSean Jackson, which leaves 216 targets up for grabs. If Reed can remain relatively healthy — a huge "if" for this player — he'll have a clear shot to finish as the top tight end in fantasy.

FANTASY SPIN: Reed has never appeared in more than 14 games in any of his four pro seasons, and he has a deep, troubling concussion history. You cannot draft him expecting an injury-free experience. However, it's irrefutably true that Reed is among the most talented receivers at his position, a terrific downfield threat who has established excellent rapport with his quarterback. During the offseason, Washington head coach Jay Gruden went so far as to say "the offense runs through" Reed in 2017. This player is set up for a career year, if he can simply manage to keep himself on the field for 13 or more games.

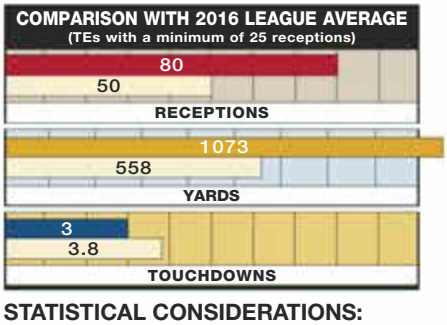
'16	CAR	16	80	129	1073	67.1	13.4	78	3



STATISTICAL CONSIDERATIONS: Olsen hasn't missed a game in the past nine seasons. How's that for a statistical consideration? He's one of the most bankable, predictable tight ends of the fantasy era, as his numbers the past three years have been both excellent and absurdly consistent. He's the rare NFL player who reached his peak in his age 29-31 seasons. Carolina will presumably attempt a few more passes to running backs in 2017, now that Christian McCaffrey is in the mix, but this team hasn't made meaningful changes to its receiving corps. Olsen has never caught more than seven TD passes in any of his six years with the Panthers, so don't expect many spikes.

FANTASY SPIN: Olsen has finished as the No. 4 fantasy tight end in each of the past three seasons, so his placement here shouldn't surprise anyone. He isn't the sort of player who can singlehandedly win you a championship, or even a weekly matchup. But he's the unrivaled master of the 5-for-65 fantasy line with the occasional touchdown, and that level of production has significant value at this spot. Also, owning Olsen means you won't need to carry a second tight end on your roster, except to cover a bye week. Even at 32, he deserves to be drafted among the top five at his position.

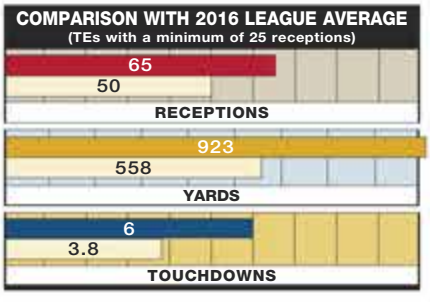
'16	SEA	16	65	95	923	57.7	14.2	42	6



STATISTICAL CONSIDERATIONS: In Seattle, Graham has no realistic chance to put up the numbers he routinely produced as the central weapon in the Saints' passing attack. However, he still managed to finish as the second highest scoring fantasy tight end in 2016, hauling in 65 receptions on 95 targets while gaining 923 yards. He ranked third in total red-zone targets (20), crossing the goal line six times. Many of us doubted that Graham would regain anything close to his old playmaking ability following a severe knee injury (patellar tendon). But he proved us wrong, appearing in all 16 games and delivering three 100-yard performances.

FANTASY SPIN: Graham returned from an injury that's been known to derail careers, so it's tough to overstate just how impressive he was last season. He's now on the wrong side of 30, but the aging curve isn't necessarily the same for tight ends as it is for running backs; there's no reason to believe he is about to fall off a statistical cliff. We need to consider the possibility that Seattle's offense may return to its run-heavy ways with Eddie Lacy now atop the depth chart. Last year, Russell Wilson's pass attempts increased by 63 over his 2015 total. If Wilson returns to modest (but efficient) pass volume, it's a small concern for Graham. Still, he displayed enough of his old form last season to earn a fifth- or sixth-round ADP.

He ranked third in per-game fantasy scoring last year, but missed half the season due to injury. And now, of course, he's coming off back surgery, hardly a lock to be ready for training camp. '16	TEN	15	65	102	800	53.3	12.3	47	7

STATISTICAL CONSIDERATIONS: Walker didn't match his 2015 performance last season, as his receptions fell from 94 to 65 and his yardage dipped from 1,088 to an even 800. But his production was still enough to land him among the top five fantasy scorers at his position for a second straight year. He remains a trusted target for Marcus Mariota, particularly near the end zone. Walker saw 17 red-zone chances and established a career high in touchdowns (7). He's received 100-plus targets in three consecutive campaigns, catching at least 63 balls each year.

Walker will find himself fighting for targets in a better, deeper receiving corps this year, no question. But he benefits from excellent rapport with Mariota, and if the offense as a whole makes a leap, that won't be a bad thing for anyone. Walker isn't going to produce another season like '15 in all likelihood, but he's a good bet to deliver another 800-or-so receiving yards with 5-7 touchdowns. Draft accordingly.

STATISTICAL CONSIDERATIONS: After three seasons marred by injuries and atrocious quarterback play, most of us ignored Rudolph during drafts last year … and that, of course, was a mistake. Rudolph proved to be a perfect match for Sam Bradford's low-risk, low-yield quarterbacking tendencies, as he finished with career highs in targets (132), receptions (83) and yardage (840). He also snagged seven TD receptions — no great surprise, as he led NFL tight ends in both red-zone chances (25) and targets inside the 10-yard line (12).

FANTASY SPIN: Rudolph isn't likely to finish as a top-three scorer at his position, as he did last season. But it's clear he will remain a key element of the passing game for Minnesota, since the team hasn't made any major tweaks to its receiving corps. Rudolph is tied to a risk-averse passer who works behind a terrible O-line, and, in fantasy terms, that's not such a bad spot for a tight end. Assuming he continues to dominate goal-to-go targets for the Vikings, he's in line for another solid season.

STATISTICAL CONSIDERATIONS: It's rare for a rookie tight end to achieve fantasy relevance because the position involves a steep learning curve. Tight ends are essentially members of both the offensive line and the receiving corps, so first-year players commonly struggle. Here's the complete list of rookie tight ends who've made a fantasy splash: Keith Jackson in 1988, Cam Cleeland in 1998, Jeremy Shockey in 2002, Gronk and Aaron Hernandez in 2010. That's it — or rather, that was it, until Henry arrived. He was drafted as the eventual replacement for Antonio Gates, and the kid made an immediate impact.

FANTASY SPIN: Henry wasn't a high-volume receiver for the Chargers in his first season, but, again, that's not unusual for a rookie tight end. He was definitely a red-zone factor for the Bolts. Even with the addition of Mike Williams and the return of Keenan Allen, it's reasonable to assume a small increase in usage for Hunter. Antonio Gates isn't getting any younger, nor healthier. Henry has earned the trust of his veteran quarterback, so another respectable TD total is upcoming.

STATISTICAL CONSIDERATIONS: Ertz has produced similar seasons in back-to-back years, catching at least 75 balls for 800-plus yards. He ranked as the No. 10 fantasy tight end in 2015, then climbed to No. 8 last season. Curiously, for the second straight year, he delivered his best statistical game in Week 17, when it helped almost no one. FANTASY SPIN: Philadelphia enhanced its receiving corps during the offseason, adding Alshon Jeffery and Torrey Smith via free agency. Those two won't necessarily compete for the same short-to-intermediate targets that Ertz typically receives, so there's no obvious reason to panic about his 2017 value. In fact, the attention demanded by Jeffery in particular should help Ertz roam free. Modest improvement from Carson Wentz would no doubt help as well. The main weakness in Ertz's profile has been a strange lack of touchdowns — four last season, two the year before — but it's not as if the Eagles ignore him. He saw 17 red-zone opportunities in 2016. If he can do a better job of cashing in, his fantasy value could take another small leap.

STATISTICAL CONSIDERATIONS:
Ebron established career highs in targets (85), catches (61) and receiving yards (711) in 2016, but again missed multiple games due to injury. Calvin Johnson's retirement shook loose a few extra targets for various Lions' receiving options, so it was no surprise that Ebron made a small leap in productivity. The critical issue for him is that, unlike many tight ends, he's barely part of the game plan when his team gets near the goal line. He saw only six red-zone chances, none inside the 5-yard line. Plus, he seems a poor bet to ever play a full schedule.

He refuses to stop producing, despite being far removed from his prime. Gates delivered a top-12 positional finish last year for the 13th consecutive season. His average yards per reception slipped to a career-low 10.3, an indication that he's lost a step (or three). STATISTICAL CONSIDERATIONS:

James appeared in all 16 games last season, catching 39 balls for 338 yards and three scores. He produced all three of his touchdowns in the opening five weeks of the season, before Ladarius Green made his return to the active roster. James isn't exactly a big-play receiver — his longest gain last year went for 24 yards — and he didn't reach 60 receiving yards in any week. But at 6-7, he's a gigantic red-zone option for Ben Roethlisberger.

FANTASY SPIN: It's unlikely James will deliver significant reception or yardage totals, but he's an appealing (if monolithic) option when the Steelers are near the goal line and the field is compressed. His path to a helpful fantasy season involves usage inside the 10-yard line. He's built for that sort of work. Pittsburgh's receiving corps offers plenty of options, obviously, but James has moved to the top of the TE depth chart following the release of Green.

STATISTICAL CONSIDERATIONS:

Many of us talked ourselves into a Cook breakout last season, banking on the Aaron Rodgers bump. But a high ankle sprain cost him six games and the breakout never quite happened (until the postseason, when he was astonishingly good). Between 2011 and 2014, Cook produced four straight seasons with at least 40 catches and 500 yards, so he's competent, though we have yet to see him make the leap to every-week fantasy relevance. Oakland signed him to a two-year deal in the offseason, but that team largely ignored its tight ends last season. Clive Walford and Mychal Rivera combined for 51 catches and four TDs on 77 targets.

FANTASY SPIN: Cook's miraculous sideline grab in Green Bay's divisional-round win over Dallas may have been the catch of the year. Or the decade. Utterly ridiculous, and not something we've come to expect from this player. Cook has been little more than a punchline for fantasy owners over the years, but he does produce a few isolated moments that highlight his rare athleticism. He's a definite upgrade for the Raiders, but, again, they rarely call on the tight end. Think of Cook as a deep-league option; he's merely a bye-week placeholder in standard-size leagues.

What They're Saying About the

2017 ROOKIE TIGHT ENDS

O.J. HOWARD

TEAM: Tampa Bay
HT: 6-6 WT: 251 40 SPEED: 4.51
COLLEGE: Alabama DRAFT: 1 (19)

"He's far and away the best tight end this year," said one scout. "He can do everything. He's got rare speed and athletic ability. He runs like a receiver. He got better as a blocker from his junior to his senior year. He's a top-level character kid. He has all the professional qualities you want. He'll end up being one of the best tight ends in the league."

"He was really good at their Pro Day," said another scout. "Big, he can run; he can catch. Alabama didn't use him to his potential — he was probably the most underused player in the country. When they did, it was a big play. Usually it was downfield throws."

"He's as talented as Greg Olsen," said a third scout. "He doesn't have near the instincts Olsen had coming out of college, but I think he will be a star. It's just going to take a little time."

EVAN INGRAM

TEAM: New York Giants
HT: 6-3 WT: 234 40 SPEED: 4.42
COLLEGE: Mississippi DRAFT: 1 (23)

"Amazing speed and separation," said one scout. "He's a smooth athlete who's gonna play a lot in the slot. He maybe can do some back-side stuff blocking, but at the point of attack, he's going to get crushed. He's maybe 240 soaking wet."

"He's a better college football player than Jordan Reed was," said another scout. "He's a matchup nightmare for slot defenders. He's in and out. Catches the ball well. Not afraid to block, but that's not his forte. He'll be in the slot all the time."

DAVID NJOKU

TEAM: Cleveland
HT: 6-4 WT: 246 40 SPEED: 4.64
COLLEGE: Miami, Fla. DRAFT: 1 (29)

"He's a beautiful looking thing," said one scout. "His broad jump (11-1) and vertical jump (37½) were out of this world. He's very explosive linear, but when he runs, he's kind of stiff in the upper body, a little herky-jerky. He had a lot of drops two years ago, but last year cleaned up his hands a little bit. I don't know how self-motivated he is to be a really good player. He needs a boot to his butt."

"A lot of 'wow' plays," said a second scout. "An athletic freak. He's better after the catch than O.J. Howard. O.J.'s a better player, but this kid has a lot of upside. Everybody seems to like him, but he is raw as can be."

GERALD EVERETT

TEAM: Los Angeles Rams
HT: 6-3 WT: 239 40 SPEED: 4.62
COLLEGE: South Alabama DRAFT: 2 (44)

"He's got some rarities post-catch," said one scout. "I don't know if he'll ever be an in-line 'Y' guy, but he is competitive. He does the search-and-seal stuff. He's a big flex slot that teams are looking for now. He can probably be a 250-pound guy. He's lean, but broad-shouldered and tapered. Looks the part."

"Smart kid, works hard, but he not a weight-room guy," said another scout. "The only thing that holds me back on him is he's got smallish hands."

ADAM SHAHEEN

TEAM: Chicago
HT: 6-6 WT: 278 40 SPEED: 4.79
COLLEGE: Ashland DRAFT: 2 (45)

"A skilled big man," said one scout. "Capable of dominating the competition. He's beyond prototypical size for the position, and he's a receiver, too. Two years from now, he's got a chance to be like Jason Witten."

"A huge, huge, huge guy," said another scout, "but he should be a more dominating presence as a blocker than he is. He's a project. He's got decent hands. Not very fast. You look at the upside and hope he'll be a blocking, safe-catching tight end."

JONNU SMITH

TEAM: Tennessee
HT: 6-3 WT: 248 40 SPEED: 4.62
COLLEGE: Florida International DRAFT: 3 (100)

"He does a lot of damage after the catch," said one scout, "and he has the speed to attack all three levels of the field. His hands are inconsistent, and that could hold him back. He's not the biggest guy, but he's more than willing to block and does a good job in the combination stuff."

"A real athletic guy that can create some coverage mismatches," said another scout. "He's got loose hips, moves laterally really well, and is really fluid in space. He's got to get better with his hands — he's a body catcher — and he's not real crisp on his routes."

Scouts' quotes were gathered prior to the NFL Draft.
40 speeds are from the NFL Combine, when available.

STATISTICAL CONSIDERATIONS: Hooper had a quiet rookie season for the most part, as is the case with nearly all first-year tight ends. He caught 19 passes in the regular season, then added six catches for 65 yards with a touchdown in the playoffs. Hooper made a house call in the Super Bowl, too, drawing six targets in Atlanta's epic, unimaginable collapse. He was a steady and effective player at Stanford, catching 74 balls for 937 yards and eight TDs over his two seasons.

FANTASY SPIN: With Jacob Tamme out of the team picture, Hooper is an obvious candidate to make a leap in value. He's still only 22 years old, so there's plenty of growth potential. Hooper's postseason performance last season was plenty encouraging. He's attached to an excellent quarterback and an explosive offense, so he's a reasonable late flier in deeper fantasy formats.

STATISTICAL CONSIDERATIONS: Fleener had a phenomenal fantasy setup in 2016, playing in a dome for a pass-heavy offense, tied to one of the most accurate quarterbacks in NFL history. He turned his golden ticket into 50 catches for 631 yards and three scores. Dropped passes and missed opportunities will always be part of the Fleener experience, it seems. He can be a brutal watch. And he isn't known for his blocking, so he's not an all-situation tight end. He was the worst sort of bust last season — a player who did just enough to make you consider re-adding him at various points throughout the year. Let's all break the Fleener habit, together.

Gostkowski lost his hold on the top spot in 2016. After leading the NFL in scoring for four consecutive seasons, he slipped into a tie for eighth with 127 points, a decline of 24 points from the previous season. He was particularly quiet from Weeks 4-10, with only nine field-goal attempts across seven games. Throw in three missed extra points and just two makes from 50-plus, and it was a surprisingly tepid season for the 11-year veteran. Gostkowski is still tied to one of the league's best offenses, and his job is secure — he signed a four-year, $17.2 million deal in 2015.

Bryant piled up 158 points to lead the NFL and outdistance runner-up Justin Tucker (141) by more than a point per game. While Bryant is unlikely to repeat a dreamy career year at his age, there's still lots to like for 2017: the same high-powered offense, an aggressive and improving Falcons defense to provide takeaways and field position, and 10 of his 16 games in domed stadiums.

misfired on three extra-point attempts. He remains an asset on kickoffs, routinely driving the ball through the end zone. All in all, the Hopkins' profile is still positive, and one might argue that his 2016 struggles were a little misleading, as four of his misses banged off the uprights. We still like Hopkins as a top-10 fantasy kicker.

The No. 9 kicker in *Lindy's* preseason rankings last year, Tucker skyrocketed into the elite class. He led the NFL in field goals with 38, missed just one attempt all season, was a stunning 10-for-10 from 50 yards-plus and amassed 141 points to rank second in the league. His 10 long-range makes tied an NFL record and lent some plausibility to Tucker's boast that he could hit from 84 yards under peak conditions (Tucker did make a 75-yarder during a Pro-Bowl practice session). Tucker and his nuclear right leg have averaged 134.5 points over the past five seasons.

Gano had a shaky 2016 on the heels of a monster 2015, things immediately going downhill when he missed a potential game-winning field goal in a season-opening loss to Denver. By season's end, Gano had missed eight field-goal attempts and three PATs and finished outside the top 12 in kicker scoring with 121 points (down from a franchise-record 146 in 2015). Walsh had a difficult 2016, unable to contain the emotional fallout from the worst miss of his career, a 27-yarder that would have lifted the Vikings over Seattle in the 2015 playoffs. After Walsh missed four field-goal attempts and four PATs over the first nine games of 2016, Minnesota sent him packing in November. Sturgis got a job with the Eagles in 2015 when Cody Parkey suffered a season-ending groin injury, and he retained it last season after beating out Parkey in a training-camp kicking competition. Surprisingly, Sturgis finished fifth in the NFL scoring race with 135 points, easily his best performance in four pro seasons, on the strength of a career-high 41 field-goal attempts and a career-best 85.4 percent accuracy rate. One of the NFL's longest-tenured kickers, Janikowski has seldom been a desirable fantasy commodity, owing of course to the Raiders' general ineptitude over the past 14 seasons. Janikowski did have one performance spike — he scored 142 points back in 2010 — and could be primed for another one with the Raiders on the rise. They have an improving quarterback and a stellar offensive line, suggesting red-zone trips should be plentiful. Janikowski still has an electric leg, with a career-long field goal of 63 yards, along with 54 other makes from 50-plus.

Held back last season by a moribund Broncos offense, McManus finished No. 17 in kick scoring with 119 points, though there were some notable highlights, including a season-best 55-yarder at Oakland. McManus was spot-on from mid-range, running his two-year total to 39-for-39 on field goals from inside of 40 yards. Of course, McManus already had bought himself a very long leash with his 10-for-10 performance in the Broncos' 2015 Super Bowl run. There are better options in standard, 12-team fantasy leagues, but keep McManus on your bye-week radar.

A former pro soccer goalie who took up kicking in college, Lambo has had an uneven first two years in the NFL. He has demonstrated elite leg strength — he led the league in touchbacks last season with 67 — but his field-goal work has been scattershot. Lambo missed all three of his attempts from 50-plus in 2016, had three PATs blocked, and rocketed a few of his kickoffs out of bounds. The Chargers signed Younghoe Koo, a rookie free agent from Georgia Southern, to push Lambo in camp; the winner could finish as a top-15 kicker if everything breaks right.

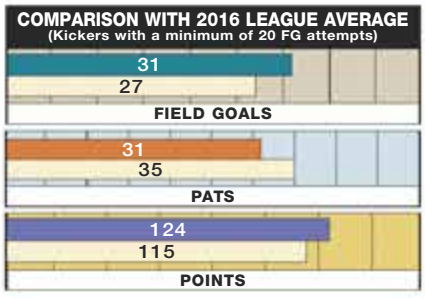
'16	DET	16	31	36	86.1	58	31	33	124



Prater scored 124 points in 2016, and his total looks even better when bonus points are added for his seven makes, with nary a miss, from 50-plus. Seemingly immune to pressure, Prater was 8-for-8 on field goals in the final three minutes of games. So he checks all the boxes: He's clutch; he's accurate; and his leg strength is off the charts. Prater set an NFL record with a 64-yarder for Denver in 2013, and holds the Lions' franchise record with a 59-yarder. While other kickers have more situational upside, Prater can be a perfectly serviceable option in 2017.

Myers was one of the league's best long-range kickers in 2016 — he finished in a tie for second with seven makes from 50 yards or longer, three behind NFL leader Justin Tucker. His big right leg yielded touchbacks on 60 of his 76 kickoffs as well. But it's all about volume in fantasy, and Myers didn't get enough field goal or PAT opportunities to rank with the elite kickers (he finished a distant 18th

in basic scoring with 110 points). With Leonard Fournette on board, the Jags' offense should be improved in 2017. Think of Myers as a backup/bye-week fill-in with upside.

Boswell had a dream season in 2015 when he caught on with the Steelers mid-season and converted 92.3 percent of his field-goal attempts, including a 7-for-7 showing in the playoffs. He was still efficient in 2016, but his opportunities declined markedly — just 25 field-goal attempts all season. Even with 36 PATs, Boswell could muster only 99 points to rank 22nd among kickers. Boswell showed what he can do when given a chance — he set an NFL playoff record with six field goals in Pittsburgh's 18-16 victory over Kansas City in the AFC divisional playoffs.

His run as one of the NFL's most reliable kickers came to a screeching halt last season as Hauschka played himself out of a job with the Seahawks. He was shaky even from inside 30 yards, missing two short field-goal attempts and misfiring on six PATs. Hauschka does boast a career accuracy rate of 87.2 percent on field goals and has made some big ones over the years, and when he became an unrestricted free agent in March, the Bills snapped him up quickly on a four-year contract. His short-term upside is limited; former Bills kicker Dan Carpenter scored 97 points in 2016.

11 for the Defense

The NFL's Top Defensive Playmakers

By Jim Thomas

1. VON MILLER

OUTSIDE LINEBACKER

DENVER BRONCOS

HT: 6-5 WT: 245 AGE: 28
COLLEGE: TEXAS A&M NFL SEASONS: 6

J.J. Watt's attempt to three-peat as our top Impact Defender ended with a back injury in Week 3 of the 2016 season. It wasn't tough to come up with a replacement for the Houston Texans' elite defensive end. Miller might have finished eighth in the "Dancing with the Stars" competition a year ago, but he's No. 1 when it comes to tap-dancing on quarterbacks. Miller is at the peak of his career and clearly the top pass rusher in the game. When he comes screaming off the edge, the nightmare is just beginning for quarterbacks. Even though he tailed off at the end of last season, Miller finished second in the NFL with 13.5 sacks, bringing his career total to 73.5 in six seasons. In a league that continues to be dominated by the passing game, a guy like Miller serves as a huge eraser. The Broncos' $100 million man has been worth every penny.

2. KHALIL MACK

END

OAKLAND RAIDERS

HT: 6-3 WT: 250 AGE: 26
COLLEGE: Buffalo NFL SEASONS: 3

Mack was not far behind Von Miller in sacks last season, racking up 11. While a handful of pass rushers had higher sack totals, give Mack his due. Week-to-week, down-to-down, he's a force. In fact, he's the scariest edge rusher in the game not named Von Miller. Mack is a couple years younger than Miller, and some observers feel Mack might be a bit better as a pure pass rusher, although he's not quite as fast. Mack also packs some power behind his speed. Although he's just three years into his NFL career, Mack has become a playmaker and difference-maker for an ascending Raiders team. And that's not a welcome development for the rest of the AFC West — or the rest of the league.

3. AARON DONALD

TACKLE

LOS ANGELES RAMS

HT: 6-1 WT: 285 AGE: 26
COLLEGE: Pittsburgh NFL SEASONS: 3

Donald's talents to a degree have been wasted on a Rams team that has won only 17 of 48 games since selecting him 13th overall in the 2014 draft. Injury issues to former Pro Bowler Robert Quinn over the last two seasons have allowed opponents to tailor their blocking schemes to neutralize Donald. Double teams have become the norm, but Donald still finds a way to disrupt, dropping running backs in their tracks and causing quarterbacks to run for their life. There's an additional challenge for Donald this year, considering new Rams defensive coordinator Wade Phillips is implementing a 3-4 scheme. Donald doesn't have the size of a prototypical 3-4 nose tackle or 3-4 end — but it shouldn't matter. Look for him to line up in different positions, putting his unique combination of leverage and quickness to good use.

4. ERIC BERRY

SAFETY

KANSAS CITY CHIEFS

HT: 6-0 WT: 212 AGE: 28
COLLEGE: Tennessee NFL SEASONS: 7

Even if he was a run-of-the-mill player, Berry's battle with Hodgkin's lymphoma a couple of years ago and his cancer-free return to the NFL is a heartwarming story. However, there is nothing run-of-the-mill about Berry's game. He was a huge star in college at Tennessee, and after seven seasons and five Pro Bowls in the NFL, all signs point to the Pro Football Hall of Fame in Berry's future. He does it all — blitz, make tackles and play the back end. What makes Berry a truly great player are his game-changing plays. Just ask the 2016 NFC champion Atlanta Falcons. He scored a game-winning, two-point conversion against them in Week 13, becoming the first player to intercept a two-point conversion pass and return it to the opposite end zone for two points since the rule was enacted in 2015. Berry also had a conventional "pick 6" that day.

5. AQIB TALIB

CORNERBACK

DENVER BRONCOS

HT: 6-1 WT: 205 AGE: 31
COLLEGE: Kansas NFL SEASONS: 9

The Broncos slipped from Super Bowl champions to not even making the playoffs last season, but don't blame Talib, who remains an aggressive, smothering, shutdown corner. He has had at least three interceptions and a dozen pass breakups for four consecutive seasons, dating to 2013, his last season with New England. And he's had at least one "pick 6" in four of his past five seasons. That is what you call consistency, and why Talib is No. 5 on the Impact Defenders list for the second straight season. Talib posted his usual numbers last season, despite missing three games because of a back injury. It's more than just statistics with Talib, or with the rest of the men on our elite defenders list. When you look through the prism of an offensive coordinator, Talib is the type of defender that makes you lose sleep.

6. MARCUS PETERS

CORNERBACK

KANSAS CITY CHIEFS

HT: 6-0 WT: 197 AGE: 24
COLLEGE: Washington NFL SEASONS: 2

There are ball skills, and then there are Peters' ball skills. In two NFL seasons, he has 46 pass breakups and 14 inter-

ceptions. He occasionally gets burned gambling on a play, but the rewards have far outweighed the risks. It takes sharp instincts, elite closing speed and a lot of film study to accomplish what Peters does on a consistent basis. He got the ultimate sign of respect for a cornerback last season — teams started throwing away from him. With Darrelle Revis in decline, Peters might be the best cornerback in the league, although fans of Aqib Talib and perhaps Richard Sherman would beg to differ.

7. LANDON COLLINS

SAFETY

NEW YORK GIANTS

HT: 6-0 WT: 225 AGE: 23
COLLEGE: Alabama NFL SEASONS: 2

Normally it takes more than one breakout season to become an Impact Defender. But we can't ignore the superb season that Collins logged for Giants defensive coordinator Steve Spagnuolo in 2016. Collins always has been a tough guy that thrived in the box, banging heads against the run, and last year his supposed deficiencies on the back end disappeared. Like Eric Berry, Collins made plays that changed games, making a gigantic jump from his rookie season. He racked up 125 tackles and four sacks, and also had five interceptions and 18 pass breakups. He returned an interception 44 yards for a touchdown against the Rams in a 17-10 October victory in London, beginning a streak of four consecutive games in which Collins had at least one interception.

8. BOBBY WAGNER

MIDDLE LINEBACKER

SEATTLE SEAHAWKS

HT: 6-0 WT: 245 AGE: 27
COLLEGE: Utah State NFL SEASONS: 5

When it comes to NFL middle linebackers, Wagner has toiled in the shadows of the great Luke Kuechly of Carolina. Kuechly fell off this year's Impact Defenders list — for the first time in four years — after missing the last six games of the 2016 season because of a concussion. That left an opening for Wagner, and he certainly is deserving. The three-time Pro Bowler registered a career-high 167 tackles last season. Like the top middle linebackers in the modern game, Wagner is more than just a run-stopping specialist. He also is adept at rushing the passer (4.5 sacks last year) and effective dropping in coverage. And like most of his teammates on the vaunted Seattle defense, he plays with an attitude.

9. NDAMUKONG SUH

TACKLE

MIAMI DOLPHINS

HT: 6-4 WT: 305 AGE: 30
COLLEGE: Nebraska NFL SEASONS: 7

Criticize him for drawing penalties and for his occasional displays of poor sportsmanship, but do not deny Suh his rightful standing as one of the game's best interior defenders. He provides an interior pass rush, is stout against the run and is relentless to the ball. Suh is less of a penetrator than Aaron Donald, but is strong enough to play along the line of scrimmage and quick enough to pursue when the play goes elsewhere. When the situation calls for it, he turns speed to power on the pass rush. Did we mention that Suh plays angry? It's almost an old-school approach, but one that still plays well in today's NFL. It has played out well enough for Suh to keep worthy D-tackle candidates such as Geno Atkins and Gerald McCoy off our elite list.

10. JADEVEON CLOWNEY

LINEBACKER/END

HOUSTON TEXANS

HT: 6-5 WT: 270 AGE: 24
COLLEGE: South Carolina NFL SEASONS: 3

The wait is over for the NFL's No. 1 overall draft pick in 2014. After two underwhelming seasons, including a rookie year limited to four games because of knee surgery, Clowney bloomed into a dominating presence in 2016. By the end of his third season, Texans' opponents had to game-plan specifically for Clowney. He made six sacks and 16 tackles for loss, and was selected to the Pro Bowl. In part because of injuries to teammates, the Texans utilized Clowney's skills according to the game situation. He has proved to be most effective playing on the edge and crashing down on the quarterback. The thought of Clowney and a healthy J.J. Watt on the same D-line this season cannot be pleasant for the rest of the league.

11. MICHAEL BENNETT

END

SEATTLE SEAHAWKS

HT: 6-4 WT: 274 AGE: 31
COLLEGE: Texas A&M NFL SEASONS: 8

There's more to Seattle's "Legion of Boom" than its heralded secondary. The more you watch Bennett play, the more you realize what a disruptive force he is on the Seahawks' front. Versatility is his hallmark. He can play end and provide pressure off the edge, and he can dip inside and cause headaches for guards and centers. Bennett plays bigger than his size, utilizing a combination of power and what some describe as "slipperiness." He's just hard to block. Bennett turns 32 in November, but the Seahawks, confident he has some good years left, signed him to a three-year, $30 million contract extension last December.

CHRISTIAN McCAFFREY

ROOKIE PROSPECTUS

These first-year players could work their way into starting positions and fantasy relevance in 2017

1. LEONARD FOURNETTE

POS: RB HT/WT: 6-0, 228 TEAM: Jacksonville

STATISTICAL CONSIDERATIONS: Fournette's performance for LSU in 2015 was one of the most impressive start-to-finish campaigns in memory. He carried 300 times for 1,953 yards and 22 touchdowns, topping the 100-yard mark in 10 of 12 games. You won't see a more impressive game on tape than his effort against Auburn (19-228-3) … except maybe his game against Ole Miss last year (16-284-3). Fournette was limited in 2016 by an ankle injury and had 129 carries (6.5 YPC) over seven games. He wasn't a weapon in the passing game, catching 41 passes over three seasons.

FANTASY SPIN: If this were the 1970s, when running backs ruled the NFL, Fournette likely would have been the top pick in the draft. He possesses a freakish combination of size and speed, and he obliterates defenders at every opportunity — he's not a runner who goes down quietly. Long term, we should be concerned about his desire to bulldoze opponents instead of avoiding them, but that punishing style is fun to watch and wildly productive. Look for the Jags to position Fournette as a high-volume runner in his first season.

2017 FANTASY RANK: No. 7 RB

2. CHRISTIAN McCAFFREY

POS: RB HT/WT: 5-11, 200 TEAM: Carolina

STATISTICAL CONSIDERATIONS: McCaffrey's body of work over the past two seasons at Stanford was astonishing, and his tape is full of humiliated tacklers. He averaged 183.1 scrimmage yards per week over his 25 games since 2015. His career yards per carry was 6.2 and his average yards per catch was a ridiculous 12.2. He caught 45 balls in 2015 and another 37 in 2016, establishing his receiving skills for pro scouts. McCaffrey was a dominant player at the NFL Combine, leading running backs in the three-cone drill (6.57 seconds) and the 60-yard shuttle (11.03).

FANTASY SPIN: McCaffrey is undersized for a featured NFL runner, but possesses every other trait the league wants in a workhorse. He was a terrific between-the-tackles ball-carrier at Stanford, and is a deadly outside runner as well. His hands and routes are excellent. There's little question he'll be Carolina's primary back, relegating Jonathan Stewart to a supporting role. However, it's not necessarily the ideal landing spot, as Cam Newton will poach a few goal-line carries, and the QB isn't known for his touch in the short passing game. Nonetheless, McCaffrey shouldn't fall outside the first three rounds in any draft.

2017 FANTASY RANK: No. 12 RB

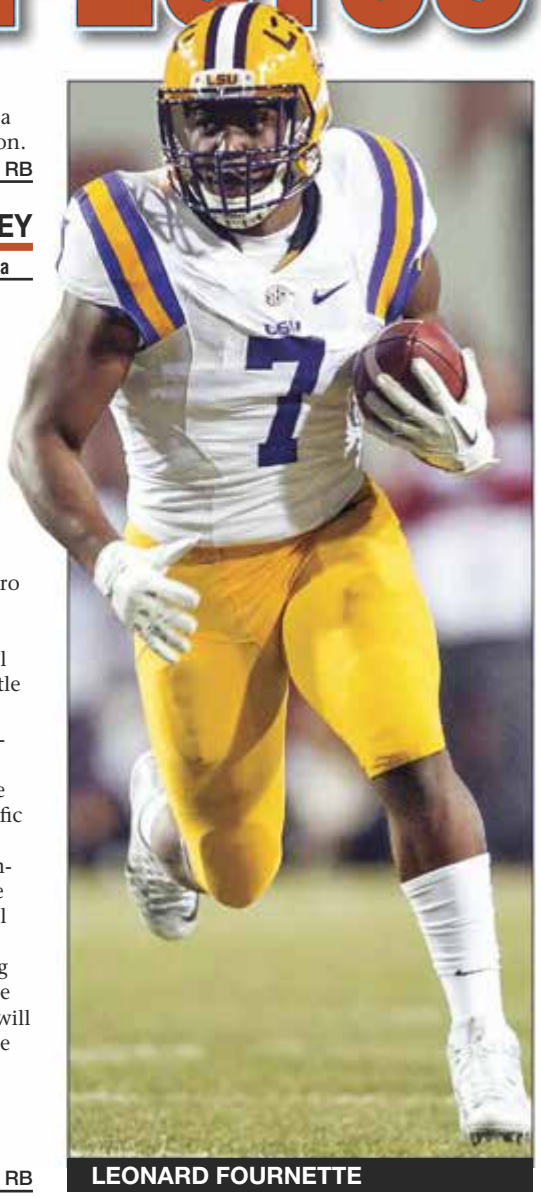

PHOTO BY BRETT RCJO-USA TODAY SPORTS

LEONARD FOURNETTE

3. JOE MIXON

POS: RB HT/WT: 6-1, 228 TEAM: Cincinnati

STATISTICAL CONSIDERATIONS: Mixon accounted for 1,812 scrimmage yards and 15 TDs last season on only 224 touches, averaging 6.8 yards per carry and a whopping 14.5 per catch. His workload was smaller in his first year at Oklahoma, but those insane per-touch averages were similar (6.7 YPC, 12.7 per catch). Cincinnati has run the ball frequently and ineffectively with Jeremy Hill over the past two seasons (445 attempts, 3.7 YPC), so Mixon should have minimal trouble surging past him on the depth chart.

FANTASY SPIN: Mixon was a first-round talent who slipped in the draft because he punched a woman in the face. He boasts a full skill set and ideal size, and should be an immediate asset on passing downs, which isn't true of many rookies. Giovani Bernard is returning from ACL surgery and Hill has been lousy for two seasons, so Mixon has a clear opportunity to make an impact early in the year. The open question is whether the Bengals will continue to use Hill as their primary goal-line runner, a role that's allowed him to deliver 20 rushing scores over two seasons. Even without guaranteed ownership of the inside-the-5 workload, Mixon is an intriguing talent, well positioned for first-year fantasy production.

2017 FANTASY RANK: No. 17 RB

4. DALVIN COOK

POS: RB HT/WT: 5-10, 210 TEAM: Minnesota

STATISTICAL CONSIDERATIONS: Cook was enormously productive at Florida State in his three seasons. As a junior, he ran for 1,765 yards and 19 scores on 288 carries (6.1 YPC) and caught 33 passes for 488 yards. The year before, he was even better on a per-carry basis (7.4 YPC) while running for 1,691 yards and 19 TDs. However, Cook had a disastrous Combine performance, particularly in the agility drills, raising questions about his ability to transition to the NFL. He ran through wide rushing lanes at FSU, and those will not be present in Minnesota.

FANTASY SPIN: You might think of Minnesota as a nice landing spot for Cook, because he has to beat out only Latavius Murray and Jerick McKinnon for touches. But Cook will find himself running behind an under-construction offensive line that was atrocious in 2016. He's also tied to an offense that ranked 28th in total yards and 23rd in scoring. Every league is going to have an owner who sees Cook as a sure-fire RB2 with top-10 upside. Try not to be that person.

2017 FANTASY RANK: No. 27 RB

5. COREY DAVIS

POS: WR HT/WT: 6-3, 209 TEAM: Tennessee

STATISTICAL CONSIDERATIONS: Davis collected 1,400-plus receiving yards in each of his final three years at Western Michigan, and he ended his career as the most prolific receiver, by yardage, in Division I history. That tidbit may or may not mean something for pro potential — if you peruse Top 20 lists of receivers by yardage in college football history, you won't find a single star in the mix. Davis has ideal size and athleticism, and he's a thinker — note his 31 score on the Wonderlic.

FANTASY SPIN: We'll sign off on Davis as a future fixture, and perhaps a star, but it might be difficult to hit the ground running in Tennessee. The Titans already have an established top receiver and tight end (Rishard Matthews and Delanie Walker, respectively), and the team balanced run and pass more than most clubs last year. Davis is coming back from minor ankle surgery in February. Go ahead and grab him for your dynasty rosters, but be careful not to overdraft him in one-and-done formats.

6. SAMAJE PERINE

POS: RB HT/WT: 5-11, 233 TEAM: Washington

STATISTICAL CONSIDERATIONS: Perine powered his way to three straight 1,000-yard rushing seasons at Oklahoma, with a career-high 1,713 on 263 carries (6.5 YPC) in 2014. He found the end zone 51 times over three years, demolishing countless would-be tacklers along the way. He joins a Washington backfield that's short on talent and ranked near the bottom of the league in total rush attempts (379) and rushing yards (106.0 YPG) last season.

FANTASY SPIN: If you like running backs who dazzle with slick cutbacks and spin moves, Perine isn't your guy. He's a bully, a power runner who hammers defenders. Perine was made to win in short-yardage situations; he's not an unusually elusive runner, but that doesn't mean he's easy to bring down. He has a clear opportunity to claim the early-down rushing role from Rob Kelley in Washington. Although Perine wasn't relied upon heavily as a receiver in college, he appears capable of being an effective weapon in the screen game.

2017 FANTASY RANK: No. 38 RB

7. MIKE WILLIAMS

POS: WR HT/WT: 6-4, 220 TEAM: L.A. Chargers

STATISTICAL CONSIDERATIONS: A neck injury took Williams out of commission for most of the 2015 season, but he made an inspiring and complete comeback last fall, helping Clemson capture the national championship. His game was more about big plays in his sophomore year (18.1 YPC), but he morphed into more of a possession target (13.9 YPC) during his junior campaign. After scoring 10 times in his first 23 games, Williams found the paint 11 times in 15 starts last year.

FANTASY SPIN: The Chargers have big plans for Williams after using the seventh overall pick on him, but there's a crowded group of pass-catchers on the outside (starting with Keenan Allen, Tyrell Williams and Travis Benjamin). Williams might not become fantasy-relevant until the latter part of his rookie year, if he makes it in 2017 at all. We'll sign off on the future, but take a careful first step.

2017 FANTASY RANK: No. 57 WR

8. DAVID NJOKU

POS: TE HT/WT: 6-4, 246 TEAM: Cleveland

STATISTICAL CONSIDERATIONS: Njoku was a monster at Miami in his final season, catching 43 passes for 698 yards and eight scores. He is expected to replace Gary Barnidge, who was targeted 81 times in 2016, catching 55 balls for 612 yards.

FANTASY SPIN: Cleveland traded up in the draft to select Njoku, then released Barnidge the following day. So, yeah, the team appears to be fully committed to the new guy. Life is never easy for a rookie tight end, but there's no one notable blocking Njoku on the depth chart. He'll have every opportunity to make an impact, even if the team's quarterback situation is less than optimal (by which we mean abysmal). If you're wondering about Njoku's athleticism, it might interest you to learn that he was a 7-foot-1 high jumper in his prep days. He's an athletic freak.

2017 FANTASY RANK: No. 16 TE

9. JOHN ROSS

POS: WR HT/WT: 5-11, 188 TEAM: Cincinnati

STATISTICAL CONSIDERATIONS: Ross already has some red ink on his medical file; he tore his ACL in 2015 and needed

labrum surgery on his shoulder after last season. The shoulder problem didn't stop him from wowing at the Scouting Combine, where he clocked a blistering 4.22 (a Combine record) in the 40-yard dash. He managed 33 catches in his first two Washington seasons before exploding to a 76-1,122-17 line last fall.

FANTASY SPIN: Although the Bengals used the No. 9 pick on Ross, don't be surprised if the team handles him at a gradual pace, as the Bengals have done with many big-name receiving prospects in recent years. Cincinnati has an experienced and established set of pass-catchers on the roster, so Ross won't be given anything right away. We'll have our tape running on him all summer, but he probably won't be an instant exception to the usual rules about rookie receivers.

2017 FANTASY RANK: No. 66 WR

10. DESHAUN WATSON

POS: QB HT/WT: 6-2, 221 TEAM: Houston

STATISTICAL CONSIDERATIONS: Watson had better efficiency numbers in his second season at Clemson, but no one minded when his junior campaign turned into a national championship. Watson lost half a yard in YPA last year, and all of his rushing raw stats went down.

FANTASY SPIN: The Texans used the No. 12 overall pick on Watson, and although they don't want to put undue pressure on their rookie, they'll give him every chance to assume a starting job right away. Watson will need to make a quick adjustment from the college game, where the rules favor option plays and quarterbacks aren't asked to make a deep number of progressions. Watson gets high marks for his character, athleticism and competitiveness, but might not have the arm strength to be a star in the NFL. Then again, with the defense the Texans have assembled, they don't need a quarterback to carry the show — a game-managing season might lie in wait for Watson.

2017 FANTASY RANK: No. 26 QB

11. ZAY JONES

POS: WR HT/WT: 6-2, 201 TEAM: Buffalo

STATISTICAL CONSIDERATIONS: While Corey Davis was rewriting the NCAA record book in the receiving yards column, Jones took care of a couple of receiving marks. Jones snagged 158 catches for East Carolina last year — a record — and his 399 career grabs are also a new standard. For a player receiving as much volume as Jones did, he wasn't a big touchdown scorer — just eight TD grabs last year and a modest 23 for his career.

FANTASY SPIN: Jones improved his draft stock with a snappy Combine, and the Bills bought in — they traded up in the second round to grab him. Buffalo has one of the weaker receiving groups in the league, and there's no guarantee top man Sammy Watkins will be at full throttle. Give Jones a long look in the summer, because the Bills might need him to be a contributor right away.

12. O.J. HOWARD

POS: TE HT/WT: 6-6, 251 TEAM: Tampa Bay

STATISTICAL CONSIDERATIONS: Howard's collegiate stats aren't unusually impressive, although the career 15.1 yards per reception average is notable. He hauled in 45 balls for 595 yards as a senior at Alabama, playing in an uninteresting passing offense. He saved his best efforts for the national championship spotlight. He caught nine balls for 314 yards and three scores in Bama's two classic title matchups against Clemson.

FANTASY SPIN: Tampa Bay didn't necessarily need a tight end, but Howard is a special athlete. He's 6-foot-6, with huge hands, and he's gifted with remarkable speed, strength and agility. He crushed his workouts at the NFL Combine. His dominance in the NCAA championship game two seasons ago should tell you everything you need to know about his ceiling. Howard is a must-get tight end in dynasty drafts, as he'll be paired with a talented young QB for the next half-decade. No need to draft him in standard 10-team leagues, however.

2017 FANTASY RANK: No. 22 TE

2016 Individual Fantasy Scoring

Because Fantasy Football leagues play by a variety of rules, this statistical section provides information to fit most any system. The statistics are for the 2016 regular season. For touchdowns and field goals, the figure in parentheses is the total number; the figures following indicate the length of each score. For milestone games (100 yards rushing and receiving, 300 yards passing), the figure in parentheses is the total number of such efforts and the other numbers indicate each individual total. The team designation indicates where the player was in 2016. If there is a team in parentheses, that indicates the player's new team. If there is the abbreviation FA in parentheses, that player was released by his last team or not tendered a qualifying offer. If there is the abbreviation UFA in parentheses, that player is an unrestricted free agent. If there is the abbreviation IR in parentheses, that player ended the 2016 season on injured reserve.
